

The book of **packaging solutions**

The best ideas and products
in packaging explained

Packaging that protects...

your **products**
your **brand**
your **business**

macfarlanepackaging.com

At Macfarlane Packaging we pride ourselves on being able to offer you a wide range of protective packaging products, but we can offer you much, much more.

You'll find out how much more in this book. It contains a comprehensive product listing with all of our most popular products – and some new ones. In the first sections we consider your entire packaging operation – from storage to the moment your products arrive on your customers' doorstep. We explain where the avoidable costs are hiding and how our comprehensive range of innovative products and services can help you find and reduce them, or even eliminate them completely.

We want to help you to develop a resilient, flexible and cost-effective packaging operation that protects your products, your brand and your business over the long term; an operation that takes seasonal fluctuations in its stride and can grow with your business. The services and products you'll find in this book are the building blocks for just such an operation.

The Significant Six packaging costs

What they are, why they matter – and how reducing them **protects your products, your brand and your business**

Your products must arrive in perfect condition, on time, within managed costs. Anything less harms your reputation and hits your bottom line.

At Macfarlane Packaging we have spent decades innovating and perfecting packaging for a wide range of markets, that is strong, space efficient and increasingly sustainable.

THE SIGNIFICANT SIX

In doing so we have isolated six hidden costs that have the biggest impact on most packaging operations. Unfortunately, these costs can account for 90% – that's right, 90% – of *all* costs in a packaging operation. We call them the Significant Six. This book contains all the information about the processes and products you need to find and reduce these costs or even eliminate them from your packaging operation.

In doing so you will protect:

Your products – the right packaging solution will eliminate damages without increasing weight or bulk

Your brand – taking an undamaged product out of an easy to open, easy to dispose of (or return) package is central to a good customer experience

Your business – the right solution can dramatically reduce costs and increase efficiency while still providing perfect product protection.

THE SIGNIFICANT SIX ARE:

Storage costs	Transport costs	Damages & returns
Admin costs	Productivity costs	Poor customer experience

90%

The Significant Six could make up 90% of your packaging costs – all hidden and all harming your business. We can help you find them, bring them down or eliminate them completely.

Reduce storage costs

Reduce the amount of packaging stock held at your site, free up your valuable space and improve cash flow by letting us store your packaging.

With over 700,000 square feet of warehouse space and a fleet of 100 vehicles, our nationwide Regional Distribution Centres ensure we're always close enough to store your packaging.

You can minimise packaging stock levels and be confident in the knowledge that we can deliver where and when required.

Reduce transport costs

We can ensure you match or exceed current protection levels with lighter, less bulky packaging.

By re-thinking the pack design, significant reductions in storage, postal and courier charges can be achieved, whilst actually improving product protection.

Smaller, lighter packs maximise use of vehicle space and minimise use of materials so a bespoke pack design can make your entire logistics chain run more efficiently.

Reduce damages & returns

Our packaging experts will challenge any areas within your supply chain where there are damages and returns and offer corrective solutions.

We will help you find the right packaging to protect your products and your brand.

We understand that the packaging we produce and the design approach we take is critical in producing packaging solutions that protect products throughout the logistics chain, while minimising costs and environmental impact.

Our expertise, available locally and nationally, together with our range of products, means we can find the ideal and most economic packaging for you.

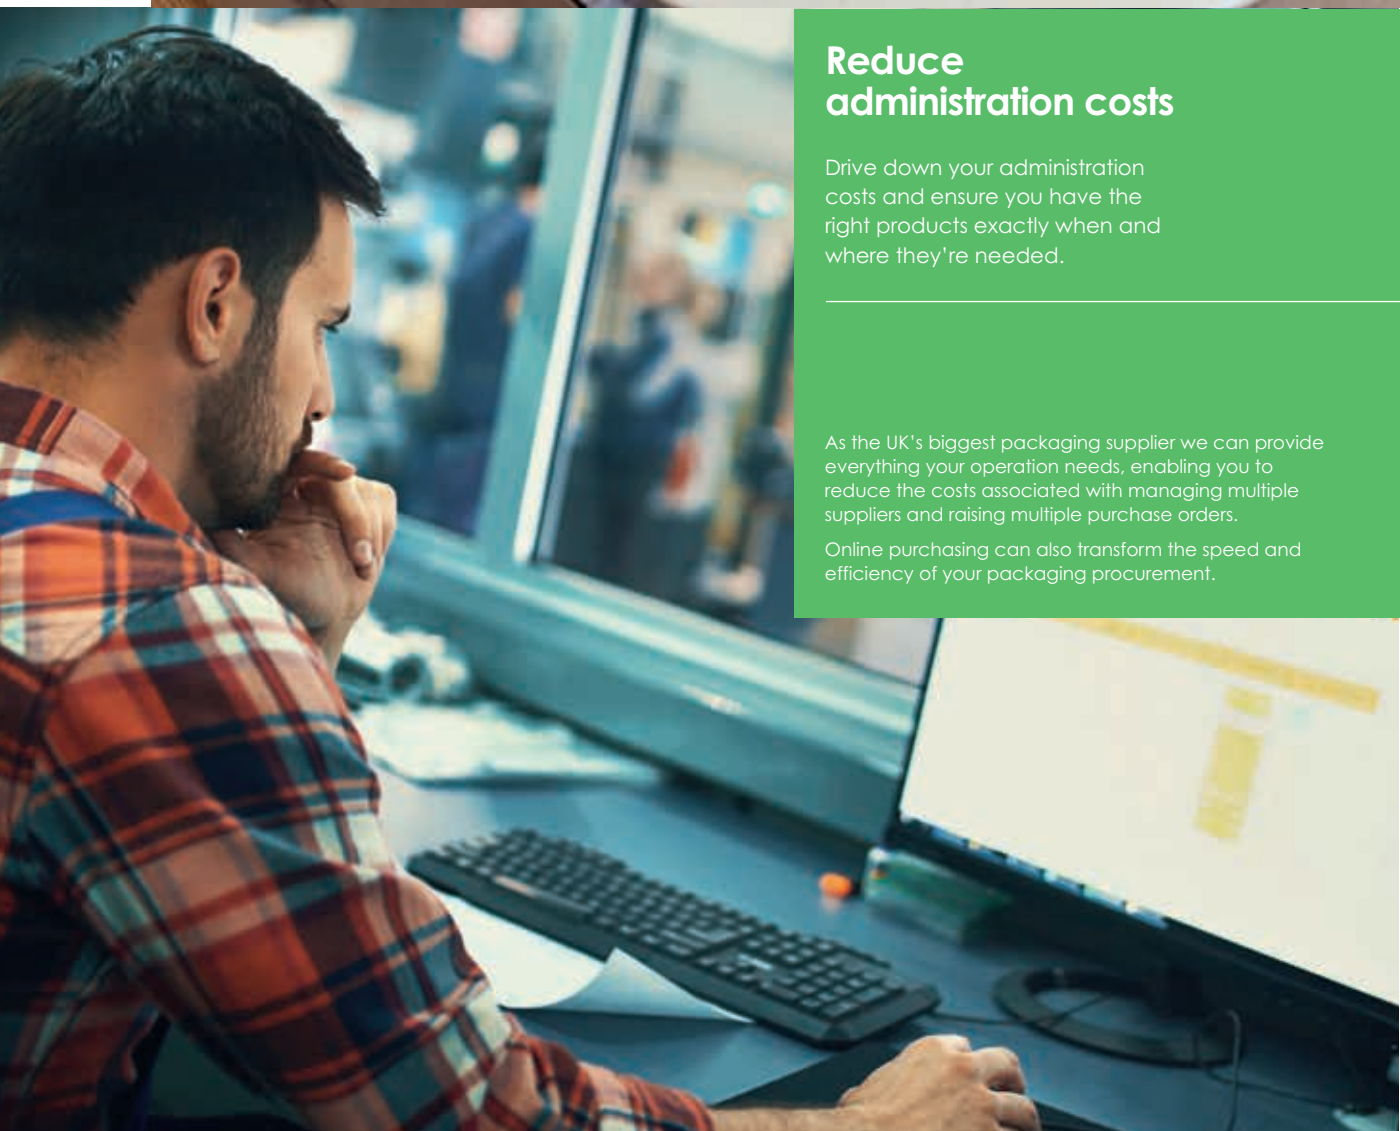

Reduce administration costs

Drive down your administration costs and ensure you have the right products exactly when and where they're needed.

As the UK's biggest packaging supplier we can provide everything your operation needs, enabling you to reduce the costs associated with managing multiple suppliers and raising multiple purchase orders.

Online purchasing can also transform the speed and efficiency of your packaging procurement.

Increase productivity

How long does it take to collate, assemble and pack each product?

Is there an alternative pack design that is faster and easier to erect, fill and seal? Ease of assembly and packing will increase output per hour and use less space.

We can review your whole operation, including: warehouse layout and size, packaging area layout, labour vs automation and logistics processes.

By focusing on product and process our innovative approach solves problems with packaging solutions that deliver speed, accuracy and product integrity.

Enhance customer experience

Enhancing customer experience whilst managing supply and demand is becoming increasingly complex and can be costly.

When customers open a package you send they are experiencing your brand. If it is difficult to open or goods are badly packed or damaged, the experience is negative.

On the plus side, packaging offers ample opportunities to promote your brand, through innovative, attractive, branded packaging that delivers a real WOW factor or simply makes your customers' lives easier.

Getting your packaging operation right has a big impact on your supply chain costs, operational efficiency and customer satisfaction.

Our packaging services have been developed to ensure this impact is positive, supporting business growth, protecting profits and enhancing brand perception amongst the people who matter most – your customers.

Custom packaging

By tailoring products to your specific requirements we can offer big benefits to your business.

Custom packaging can save time and money, it also delivers a much improved unboxing experience for your customers.

There are two aspects to the customisation we can offer you: *personalisation* and *bespoke pack design*. It is through these that our packaging most effectively protects your products, your brand and your business.

Personalisation

Personalisation, in essence, is the branding of packaging and related products with your visual identity/logo.

We can apply your identity to:

Printed tape

This is a low cost way to advertise products and services to your customer base, boosting brand awareness.

It can be printed in any design with any message. It's great for alerting couriers to handling instructions, advising customers where to reorder or to deter pilfering.

Boxes

Are you building a brand that stands out from your competitors?

Whether you are looking for a printed standard shipper box, or a more complex shelf ready pack to go direct from pallet to shop display, we can offer print services, including shop displays and dump bins.

Custom size and print polythene

Bespoke polythene products can be printed with your logo, repeat order information, product codes, handling instructions, warning labels or anything else you may require.

Pallet security

If pallet security, product tracking or branding is important to you, printed strapping or printed corner guards and edge protectors can help.

Branding means that any tampering, pilfering, or changes to your stock, become instantly evident. Printed products cannot be easily substituted, unlike generic versions.

Personalisation can play a big part in creating a positive customer experience.

Custom packaging

Bespoke pack design

Bespoke pack design is one of the single most effective ways to reduce damages, control costs and improve efficiency. It also has a key role to play in projecting your brand and protecting your reputation.

Packs carefully designed to carry only your products are the most effective way to prevent movement in transit and provide optimum protection if dropped.

Bespoke packaging can help to maximise pallet yield, increase transportation payload and reduce your carbon footprint.

Innovative designs make assembly, packing and sealing easier – so they speed up the lines and improve productivity throughout your operation.

Finally, it's worth remembering that people share bad unboxing experiences online, the most common problems being damaged goods or excessive use of packaging.

Taking a perfect product out of an easy to open, easy to return or dispose of pack gives them a good unboxing experience and reflects positively on your brand.

You can enhance this experience still further when personalisation and bespoke pack design combine, promoting your brand through logo, messages and styling on a pack that delivers on every level. This creates a real 'wow' factor and makes a lasting good impression on your customers.

Bespoke design reduces the Significant Six

Bespoke pack design is the single most effective way to:

- Reduce damages and returns
- Reduce transport costs
- Improve productivity
- Improve customer experience

CASE STUDY

BLAZE WEAR

Blaze Wear, an online retailer of high end and cutting edge heated clothing, was looking for an eCommerce packaging range suitable for shipping their products in the UK and abroad.

The company was not satisfied with their existing packaging and was interested in new solutions that would reflect the value of their products and improve customer experience with their brand.

Blaze Wear turned to Macfarlane Packaging, among other carton manufacturers, to discuss their requirements, and in response Macfarlane invited them to visit their Innovation Lab.

During the visit, Macfarlane was able to propose ideas, provide samples and offer prices – all on the same day, significantly accelerating the design and production process, from approving the concept to ensuring stock availability.

Blaze Wear was very pleased with the solution and the new eCommerce box range was manufactured ready for their website launch in September 2017. They are delighted with the outcome and the packs enhance customer unboxing experience.

Inventory management

Through inventory management we can help you reduce your packaging inventory, improving cash flow and reduce storage costs.

If you're short of storage space, we can store your packaging goods in a clean, safe environment and deliver exactly what you need when required.

Our strategically-located regional distribution centres allow us to offer nationwide coverage with over 700,000 sq ft of warehouse space.

With the fleet of 100 vehicles ranging from 3 tonnes to 40 feet articulated lorries, we deliver more than 50,000 orders per month.

Our inventory management solutions tackle storage costs through Just in Time (JIT) delivery

Benefits include:

- Lower stock holding at your site can free up space to expand your operation
- Less working capital is tied up in stock
- There is less likelihood of packaging stock perishing
- The ability to manage peaks and troughs in demand accordingly

Vendor Managed Inventory (VMI) services

By using our VMI system, you can optimise your supply chain. We will maintain your inventory levels and be responsible for generating purchase orders on your behalf.

So you get:

- Decreased inventory levels – saving money and space
- Continuity of supply
- Decreased planning and ordering costs as we will manage these activities
- You will have the right packaging materials at the right time

CASE STUDY

JAMES AND JAMES CUSTOMER EXPERIENCE

Since its incorporation in 2010, James and James fulfilment company has gone from strength to strength and continues to re-invest in its technology to lead the industry.

Macfarlane Packaging worked closely with James and James to ensure they were using the most efficient packaging for their operation. Macfarlane Packaging were able to offer a stock holding service and next day delivery of packaging materials allowing the entire packaging process to be improved. By selecting the best packaging materials and packing techniques, James and James were able to improve their packaging process to ensure packs are sent with minimal environmental impact.

Packaging is a large part of what we do and we work with Macfarlane Packaging for all of our supplies. We see them more as a partner to our business because of the way we work together. They make sure we always have the latest innovations and best packaging to offer our customers.

James Hyde
Operations Director,
James and James Fulfilment

**JAMES
AND
JAMES**

Account management

The central aim of our account management service is to support the growth of your business. It's why many clients see us as a strategic business partner.

A dedicated account manager, supported by a local team, will work with you to ensure you get the optimum packaging solution for your current and future needs. They will help you find the Significant Six packaging costs in your operation and develop the tailored solutions you need to reduce them.

Ultimately they will work with you to create a resilient, agile packaging operation that can react to the challenges of peak, adapt to changing consumer behaviour and enable you to deliver ever higher standards of service while keeping costs down.

Reducing the Significant Six – the service includes:

- National supply from a network of regional distribution centres – reducing storage costs
- Local stockholding and tailored delivery plans – reducing storage costs
- Unique consultancy and design support to:
 - Reduce damages and returns
 - Reduce transport costs
 - Improve productivity
 - Improve customer experience
- Advanced I.T. solutions with online ordering – reducing administration costs
- Bespoke, innovative management reports, giving you full visibility of your packaging spend and usage – improving productivity
- Supporting multi-sited businesses with packaging compliance

CASE STUDY

MOORES FURNITURE GROUP CUSTOMER EXPERIENCE

Macfarlane Packaging worked closely with Moores Furniture Group to help them drive down costs by providing innovative packaging solutions for their products.

By improving their packing processes, Moores Furniture were able to reduce damages and ensure that customers receive products that are fit for purpose and right the first time.

The company also benefited from a leaner supply chain, one point of contact and one point of ordering by entrusting Macfarlane with its packaging supplies

In terms of our longer strategy for packaging, Macfarlane is the key partner there. We will continue to work and develop closely through the organisation, exchanging information and best practises to enhance the range of packaging and to improve the level of service towards Moores customers, whilst keeping costs down to a level that is controllable and containable.

Richard Bywater
Senior Product Category Manager
at Moores Furniture Group

Online order management

Continued investment in Customer Connect – **Macfarlane's online packaging management solution** – ensures you have all the information you need to manage your packaging operation effectively.

Customer Connect allows you to:

- View your purchasing history to make reordering fast, simple and accurate
- Review the usage figures of your key packaging products to set future budgets
- Check the current status of all outstanding orders, and adjust your delivery schedule if required
- Identify areas of potential packaging waste to fine-tune inventory efficiency
- The ability to allow managers to add purchasers and set spend levels
- Determine which products each purchaser can order
- Allow orders to be sent to purchasing managers for approval before the order is processed, allowing ultimate control of packaging spend and usage

Customer Connect and the Significant Six

Customer Connect benefits include:

- Simplified ordering and stock management - reducing administration costs.
- Facilitating JIT delivery - reducing storage costs
- Speeding up reporting - increasing productivity

CASE STUDY

SAINSBURY'S ARGOS CUSTOMER EXPERIENCE

Argos have implemented Customer Connect to help them understand and control their packaging usage, which is ordered on their behalf by a third party logistics provider.

Sainsbury's
Argos

“

Having Customer Connect in place allows us to manage our packaging usage and track our spend by SKU. As all our packaging is ordered on our behalf by our third party provider, it gives us full visibility of operational management and total control of our budget.

It's easy to place the orders, the packaging SKUs are defined and clearly allocated to specific product lines. The real time saver is the reporting – it can all be done at the click of a button. It's helped speed up administration and has really complimented the relationship we have with our logistics provider, helping us work together smarter.”

Emoke Baugh

Packaging Manager at Sainsbury's Argos

Macfarlane Packaging – Design and Manufacture

Macfarlane Packaging – Design and Manufacture are specialists in designing and manufacturing packaging for the protection of high value and fragile goods in storage and in transit.

We use an extensive range of materials and processes for our packaging, but the process starts with leading 3D design software Solidworks. This allows us to design and refine precision packaging solutions, demonstrating them to you and even modifying them without the need for physical prototypes.

Where you are able to supply 3D models we can deliver precision, bespoke solutions before your products have even gone into production, dramatically reducing lead times.

The Macfarlane Packaging – Design and Manufacture division employs over 140 people to design and manufacture several thousand different types of bespoke composite packs for customers in the following sectors:

- Industrial
- Automotive
- Defence
- Electronic
- Aerospace
- Medical

With two manufacturing sites and distribution centres nationwide, Macfarlane Packaging – Design and Manufacture can supply customers across the UK and Ireland.

Targeting the Significant Six

Macfarlane Packaging – Design and Manufacture solutions will:

- Help to reduce storage costs – through JIT solutions
- Reduce transport cost – with strong, light and compact solutions
- Deliver enhanced levels of protection – eliminating damage in storage and transit
- Reduce administration costs – with our easy online ordering system
- Reduce productivity costs – with packs that are easy to assemble and disassemble
- Provide an excellent customer experience – with packs that are easy to open and which use recyclable and sustainable materials where possible

CASE STUDY PEAK SCIENTIFIC

Peak Scientific is a leading innovator in the design, manufacture and ongoing support of high performance, on-site gas generators for the life sciences sector.

Prior to engaging with Macfarlane Packaging, the company was experiencing high freight and productivity costs, and was looking for a lightweight, high-performance packaging that would reflect the value of their brand.

Using a 3D modelling software, Macfarlane Packaging designed new packaging that was later produced from lightweight, high-performing packaging materials to help reduce product damage in transit.

The novel solution has helped Peak Scientific reduce their pack weight by 50%, leading to significant cost savings of 30%. The company has also benefited from enhanced brand experience and improved product protection on their way to customers.

Macfarlane are a valued partner to Peak Scientific, a key enabler to transformation of our supply chain with innovative, cost effective solutions and services.

David Williamson
Global Supply Chain and
Logistics Manager at Peak Scientific

Macfarlane Packaging – Innovation Lab

The Macfarlane Packaging Innovation Lab in Milton Keynes brings together the latest packaging and technology with some of the brightest people in packaging.

In this unique, creative environment you will be able to influence the development of really smart, innovative packaging solutions that could transform your operation. Ideas can be explored and solutions developed so quickly that some visitors leave with a groundbreaking prototype after just one day.

Cutting edge equipment

When you visit the Macfarlane Packaging Innovation Lab, you will find state-of-the-art technology including:

- Interactive touchscreen technology
- The latest design software
- A state of the art printer/cutting table
- Modern packing benches
- A fully equipped packaging solutions showroom equipped with the latest innovations from our global supply partners
- HoloLens mixed reality headsets to visualise and explore new packaging concepts in real world environments

Control the Significant Six

In the Innovation Lab you will work with industry experts to identify precisely how the Significant Six are affecting your operation. You will then be able to develop bespoke solutions – ranging from a printed sample to a fully modelled new packaging process – that dramatically reduce or completely eliminate these costs.

The Significant Six packaging costs are:

- Storage costs
- Transport costs
- Damages and returns
- Administration costs
- Productivity costs
- Poor customer experience

The Innovation Lab is at the cutting edge of the drive to eradicate these costs for Macfarlane Packaging customers.

CASE STUDY

FEELUNIQUE CUSTOMER EXPERIENCE

FEELUNIQUE, an online retailer for leading branded beauty products, wanted to create FEELUNIQUE into the brand rather than the seller of the brands.

They considered the demographics of their customer base and the fact that customers are buying quality products that make them feel good and look amazing. Why send a high quality branded product to a customer in an inferior box?

The new packaging range and design helped achieve these operational goals:

- Instant impact – printed outside with the FEELUNIQUE brand so when the consumer opens the box they immediately see the product, not infill packaging.
- Quality is reflected through the delivery proposition and the customer is presented with an order rather than simply having a parcel delivery.
- Very few damages due to the structure and design of the packaging. Undamaged orders increase the lifetime value of the customer with repeat orders, bringing brand loyalty.
- The branding replicates the website experience, easy opening, self seal with no ugly tape.

FEELUNIQUE has confidence in the packaging solution and added social media logos to encourage customer feedback. Any feedback is seen as an opportunity to improve which any packaging supplier should be engaged with.

Our work with FEELUNIQUE

Consolidated range from 15 – 9

- Fewer pallets from 623 to 527
- Reduced logistics costs
- Reduced space cost
- Customer Connect
- Stock and drip feed

FEELUNIQUE

“

The Innovation Lab facility is a market leading differentiator for Macfarlane, offering not only a dynamic development of packaging solutions but also, additional holistic support ranging from optimising packing station design, to replenishment. All of which drives the end to end, customer experience, which is key to our business.

Caroline James,
Global Supply Chain and
Head of Logistics at FEELUNIQUE

Packaging automation

Automation can offer advantages to large packaging operations.

The first benefits that come to mind for most people are speed and consistency, which automation clearly delivers. But it is when automation is considered not simply as an add-on, but part of a carefully planned fully integrated and tailored operational solution, that it starts to offer really substantial gains.

When the right balance between manual functions, semi-automation and full automation is found, your operation will be dramatically more resilient and flexible. Through the intelligent use of automation, we can help you achieve improvements in efficiency and quality that provide savings at every stage in your packaging process.

Most of the Significant Six – the packaging costs that could be hiding throughout your operation – can be reduced by automation. It can save you space and time and reduce transport costs, while preventing damage to shipped goods and the resulting damage to your reputation.

Automation and the Significant Six

- **Reduce packing times by up to 50%**
Auto-boxing, packing, lidding, sealing and labelling can all be done automatically so all your packer has to do is put the goods into a tray
- **Dramatically reduce your packing area**
Goods are packed more efficiently, using the right size box for your product every time. Increasing pallet yield and payload whilst reducing your carbon footprint
- **Save on transport costs**
Goods are packed more efficiently with fewer box types using auto-boxing
- **Reduce damages and returns**
Efficiently packed goods are well protected and product damage is significantly reduced
- **Improve customer experience**
Easy to open, well packed boxes that protect the goods keep customers happy and reflect well on your business
- **Save on storage space and materials**
Box types and sizes are consolidated. Along with just in time delivery, this frees up storage space for other uses
- **Reduce material costs and improve productivity**
Automation uses materials more efficiently and completes tasks more quickly
- **Speed up throughput**
Automation can dramatically increase throughput while maintaining superior quality standards

CASE STUDY

LAKELAND CUSTOMER EXPERIENCE

Lakeland has grown significantly and the ethos of this family owned market-leading business is all about the customer experience and loyalty.

Lakeland cares considerably about their customers with the Lakeland promise and no quibble returns and this is reflected in their packaging solution.

When designing the packaging solution, Lakeland considered the demographics of their customer base, age, gender, resulting in easy opening, clear instructions.

“

Everybody at Lakeland feels the automation project at Lakeland has been very successful and that is mainly due to the partnership between Lakeland and Macfarlane. Macfarlane came to us with an idea of automation that they believed would suit the operation. Once they got us interested and we saw more, we quickly became excited about the opportunity. It has been a partnership since then that has worked very well.

**LAKELAND**

Finding exactly the right packaging, especially as your own product range evolves, is vital for product protection, brand perception and controlling costs.

We have the widest range of protective packaging stock items available for next day delivery at our locations nationwide. If you have bespoke requirements we can help with that too.

Boxes

How to measure a box

Dimensions are usually expressed as internal dimensions in mm as follows:

Length (L) x Width (W) x Height (H).

Macfarlane Packaging has internal design and manufacturing capabilities and works with the leading international packaging manufacturers to provide the best and unbiased packaging solutions, at the most competitive prices.

Length = The longer dimension at the opening.

Width = The shorter dimension at the opening.

Height = The dimension from the top of the opening to the base.

Popular FEFCO Styles

FEFCO styles are International Fibreboard Case Codes: an internationally recognised methodical presentation of case design styles.

0200

An open top box with flaps meeting at the base, which need to be sealed. Often linked with the **0422** lid and used for storage.

0203

Similar to the **0201** but the flaps fully cover the base and top. This gives added strength to the case especially if taped in certain ways.

0410

Similar to **0409** (not featured) but with the side flaps removed from the extended end panel. This reduces the bulk up of material in the corners. Ideal design for flat packs.

0201

The most common corrugated case. Outer flaps meet at the top and bottom and require sealing. It will not require any tooling unless it needs modification for specialist erecting machines. This is the most economical way to pack most products. The side seam is usually glued but can be stitched. Stacks well.

0301

Tray and lid. Used for shallow products and an economical way to purchase this format as it can be made without tooling. However, the corners of the lid and tray would need to be sealed. A neater solution would be the **0422**, particularly if the volume required is significant.

0411

An economical way to wrap flat products, typically used in the flat pack furniture market.

0422

Lid for **0200** or used as a tray. This will require a tool to make but is then easily erected without sealing.

0310

A combination pack of **0501** sleeve with **0452** top and bottom caps (not featured). Generally used for pallet packs or with automated packing systems. Requires stitching or gluing of the caps.

0202

Similar to **0201** but with the outer flaps overlapping by a specified amount. Ideal for cases where extra strength and security are needed. Excellent for use with polypropylene strapping as the method of securing.

Single Wall Boxes

Storage for every demand

Single wall provides durable protection, using outer and inner liners reinforced by specially designed fluting for added strength.

Our corrugated packaging is made from natural, renewable sources.

Single wall boxes are available in over 40 sizes to meet every demand.

Dimensions – measured internally for optimum fit – are shown in millimetres: as length x width x height.

Boxes

Double Wall Boxes

Packing with extra strength

With over 30 sizes available we offer one of the largest ranges of double-wall boxes in the UK.

The double-wall manufacture, incorporating two rows of specialised fluting, adds all the protection you need to ensure safe transit and lasting storage for heavier or bulky items.

Our commitment to best environmental practice ensures recycled and recyclable materials are used in the production of our corrugated cardboard.

Dimensions – measured internally for optimum fit – are shown in millimetres: as length x width x height.

Export Boxes

Unbeatable strength for long-haul transit

Macfarlane's export boxes provide unbeatable strength for the long-haul transit of heavy goods and are ideally suited for container storage.

Our wide range of double-wall export boxes is specially manufactured to be easily and securely palletised without crushing or damaging the contents – even when stacked.

The IATA (International Air Transport Association) reference is clearly shown on each individual export box. Internal dimensions help you calculate the perfect fit.

Recycling Refuse Sacks

Colour-coded system for easy sorting

In six different colours for paper, card, cans, glass and plastic refuse, our eco-friendly sacks will offer a simple recycling solution.

Bags are 100% recyclable and can be used with Macfarlane's cardboard office recycling bin.

The recycling refuse sacks can be used in conjunction with our cardboard office recycling bin.

Mail Lite®

Mail Lite® mailing products make up the most complete line of cushioned and non-cushioned mailers in the industry.

Advantages of using Mail Lite® products:

- **Save time and labour:** two-step packaging operation as opposed to six steps with cartons
- **Reduce packaging material costs:** eliminate the need for void fill material and tape
- **Save postage:** total shipping weight is reduced
- **Improve productivity:** especially important in periods of peak demand
- **Save inventory space:** more mailers can be stored per metre square
- **Greater security:** self-seal closures produce a more tamper evident seal

Mail Lite® White & Gold

- An economical practical and lightweight postal bag
- Clean, crisp white or gold tough Kraft outer
- Fully lined with AirCap® barrier sealed bubble for superior protection
- Self-seal strip on top flap saves time in a busy packing department/post room
- High slip film for easy insertion
- Easy to write on with excellent label adhesion
- FSC certified

Document Wallets

Self-adhesive attachment shows delivery details

Bespoke
printing
available

These labour-saving, self-adhesive, clear-fronted polythene envelopes are designed to attach product documentation, including invoices or customs paperwork to the outside of parcels.

Water, dirt and dust-proof, the envelopes save on the despatch of separate documentation and also remove the need for address labelling.

We supply a range of plain or printed envelopes to meet varied requirements.

PostalCube®

A new, innovative solution from Macfarlane Packaging

Designed to reduce packaging waste and storage of regular postal tubes. It comes flat on a roll and can be dispensed and cut to size as required. It is also courier friendly – postal cubes can be stacked for dispatch, which ensures that shipments don't roll on conveyors – and is compact and easy to store.

Postal Tubes

No-crush cover for plans, prints and posters

Macfarlane's postal tubes provide excellent cover for storing and shipping plans, prints and posters.

All of our postal tubes are supplied with snug-fitting, white plastic end caps, designed to secure the contents in transit without creasing or crushing.

The diameter of the tube is measured across the internal wall, for accurate fitting.

Twist Wrap

A simple, all purpose wrap providing an effective packing method for books and other flat items when sending by post or courier.

1 Twist

2 Place

3 Seal

Product Code	Ref	Dimensions (mm)	Pack Qty
216389	TW1	247 x 165 x 50	25
216743	TW2	280 x 200 x 70	25

Book Packs

A variety of books secured in a single package

Sturdy cardboard packs are cleverly designed in a single easy unit, to wrap and send books or flat items in the post.

The cardboard sleeve fits snugly around the book, holding it firmly in place with the inner flap. Simply wrap around, seal with the self-seal closure and post.

The packs are size adjustable to support books or similar items of differing sizes, providing the secure mailing of multiple books inside one pack.

Standard book packs, 45mm high, are recommended for books with a spine depth of 45mm or less. Deep book packs, with a height of 65mm, are recommended for books with a spine depth of 45 to 65mm.

Korrvu® Insert

Reduces the need for additional void filling or wrapping.

Korrvu® is a dynamic packaging product that uses a strong, highly-resilient low-slip film to surround your products, protecting them from shock and vibration by ensuring your product holds centre place inside the box.

Beautiful presentation and high protection.

Great for beauty products and electronic items.

Champagne Bottle Outer Box

Cardboard champagne bottle boxes. 100% recyclable, these are ideal for posting, shipping or storing champagne bottles. We strongly recommend these cardboard outer champagne bottle boxes are used with our Polystyrene Bottle Packs.

Product Code	Size (mm)	Pack Qty
001205	126 x 126 x 380	25

Champagne Bottle Polystyrene Pack

This champagne bottle polystyrene pack makes it safer to send bubbly by post, or keep in storage. Our champagne bottle packs are specially designed for use with our champagne bottle outer pack. The moulded polystyrene pack holds the bottle firmly in place, minimising the risk of damage or breakage in transit.

Product Code	Size (mm)	Pack Qty
001204	122 x 122 x 378	25

Champagne Bottle Kit

One champagne bottle mailing kit consists of an expanded polystyrene bottle pack within a corrugated case and holds a single champagne bottle.

Product Code	Size (mm)	Pack Qty
186177	126 x 126 x 380	25

Wine Bottle Boxes

Strong, durable bottle boxes are suitable for holding either 6 or 12 wine bottles and can be used for shipping and storage. A simple, pop up divider insert makes these boxes quick & easy to construct use.

Product Code	Suitable for	Size (mm)	Pack Qty
219023	6 bottles	283 x 198 x 340	10
219019	12 bottles	396 x 271 x 340	10

Outer Bottle Box

Cardboard wine bottle boxes for 75cl wine bottles.

100% recyclable, these are ideal for posting, shipping or storing 75 cl wine bottles.

We strongly recommend these cardboard outer wine bottle boxes are used with our Polystyrene Bottle Packs.

Product Code	Capacity	Size (mm)	Pack Qty
000646	1 Bottle	115 x 115 x 365	25
000648	2 Bottles	213 x 117 x 371	25
000661	3 Bottles	283 x 117 x 365	25

Polystyrene Bottle Pack

Polystyrene bottle packs offer excellent protection to standard 75cl bottles.

We strongly recommend these polystyrene bottle packs are used with our Outer Bottle Boxes.

Product Code	Capacity	Size (mm)	Pack Qty
000645	1 Bottle	116 x 110 x 362	25
000647	2 Bottles	210 x 116 x 362	25
000649	3 Bottles	280 x 116 x 362	25

AirCap®

Bubble Wrap

The difference is in the barrier!

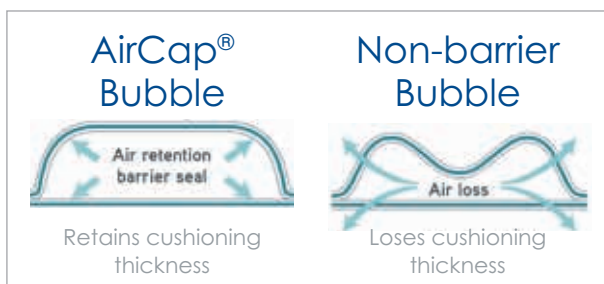

AirCap® – A better value bubble

- **Reduced Costs:** less material is required compared to non-barrier brands.
- **Longer Lasting Protection:** our full air bubble maintains consistent cushioning during storage and transit.
- **Quality Assurance:** AirCap® is manufactured under ISO 9001:2008 guaranteeing high standards of production and quality control.
- **Ideal for:** cushioning, surface protection, void filling, interleaving, blocking and bracing.

Small bubble is best suited for surface protection, defending your items against scratches and abrasions.

Large bubble is best suited for cushioning your products whilst in transit and storage.

Extra large bubble is best suited for void fill and large cushioning applications.

Bubble Wrap

Available in the following combinations:

NewAir I.B.® Flex™

Call for
demo and
pack cost
comparison

Increase throughput, small footprint

The NewAir I.B.® Flex™ inflatable cushioning system produces NewAir I.B.® and Bubble Wrap® IB materials at speeds up to 90 linear feet per minute. Faster inflation of packing material makes lines more productive, employees more efficient and gets more products out the door on time. The NewAir I.B.® Flex™ System has a compact footprint (less than 6 sq. ft) that works well in cellular packaging environments.

Maximum inflation reduces excess material up to 50%

Patented technology maximizes the inflation in every cell to reduce the amount of material needed to provide superior damage protection.

Unmatched reliability

Delays in production can slow down productivity. With the NewAir I.B.® Flex™, limit the potential for throughput loss.

Components are manufactured with high performance materials and coatings for long life system reliability.

System accessories for every configuration

The NewAir I.B.® Flex™ is supported by a large array of system accessories, making it flexible enough to be used in all packaging operations. NewAir I.B.® Flex™ is fast enough to keep up with the most demanding packaging operations.

Korrvu® Select

Reduces the need for additional void filling or wrapping

**A fast, effective,
high performance
solution**

Korrvu® Select packaging provides proven product protection and maximum versatility in a comprehensive range of sizes and easy to use designs that offers a fast, effective, high performance solution that meets the packaging demands of a variety of products and packaging applications.

Korrvu® Select packaging offers the potential for source reduction and eliminates the need for additional void filling or wrapping. It is a dynamic packaging product that uses a strong, highly-resilient low-slip film to surround your products, protecting them from shock and vibration by ensuring your product holds centre place inside the box.

Korrvu® Retention Frame

**Cost-effective blocking
and bracing protection**

Providing shock protection during the shipping cycle, Korrvu® Retention packaging provides cost-effective blocking and bracing protection whilst holding your product securely within its retention frame.

Protective

MINI PAK'R™ Air Cushion Machine

Are you looking to protect your goods during transportation? MINI PAK'R is a small, easy to use system that allows you to produce air cushions on demand. You can choose different types of air cushions, for any kind of protection you need.

Easy to use

- Plug in the machine, load the film and it is ready to go. The machine uses an internal air source, no compressed air is needed.

Latest technology

- Uses RFID (Radio Frequency Identification) technology to automatically select the correct settings for ease of use.

Versatile

- At a speed of 7,5 mtr/minute the machine makes different types of air cushions that fit a variety of packaging applications from block and brace to void fill.

Space saving

- Machine is compact (LxWxH=36x33x28cm), weighs only 6 kg, and fits almost anywhere.

Smart accessories

- The MINI PAK'R can be combined with a range of accessories to make the packaging process even more efficient. Some of the accessories are the wall mount, Top Fill, Mobile Fill and the MINI ADS.

MINI PAK'R INDUSTRIAL

Are you a larger user looking for an industrial solution, flexibility and service?

Conditions:

- Machine is placed free of charge (a contract MUST be signed, the machine will remain property of FP International)
- Minimum monthly usage should be 10 units per month
- Delivery of full pallets only

PRO PAK'R™ Air Cushion Machine

Reliability and efficiency

- One machine can run the complete range of films
- User lockout capability: adjust only specified settings
- Fast machine: Produces up to 21 meters of cushions per minute
- Designed for industrial use: 24/7

High technology

- Radio Frequency Identification (RFID) allows the machine to recognize the film type and adjust its settings accordingly
- History storage (consumption and operator usage tracking)
- Auto-Index Feature- for automatic replenishment of air cushions directly to the packer

Innovative accessories

- Other solutions are available to enhance your packing process
- MINI ADS
- Mobile Fill
- Cutting Device

Easy maintenance

- One machine can serve multiple pack stations
- No Teflon belts
- Replace sub-assemblies in under 15 minutes
- FP's 2/48 policy in case of problem: 2 hours to call you back and 48 hours to solve the problem

Instapak iMold®

The Proven Performance of Instapak® Cushioning in a Revolutionary Automated System.

The fully automated Instapak iMold® system creates engineered, pre-moulded Instapak® foam cushions for immediate use or to be transferred into storage bins for batching applications.

- **Consistent protection:** guarantees cushion consistency and integrity by dispensing Instapak® foam where it's needed most, while eliminating material waste
- **Affordable automation**
- **Reduce labour cost**
- **User friendly design** and touch screen interface is easy to use

Instapak FoamWrap™ Express

The Instapak FoamWrap™ Express foam packaging system from Sealed Air® creates Instapak FoamWrap™ material for a variety of packaging applications. The system uses a range of Instapak® high performance packaging foams that provide superior protection with minimal foam usage. A compact design, customizable programming and just-in-time accumulation capability makes the Instapak FoamWrap™ Express system a perfect fit for any size packaging operation

Instapak® Simple™

The Instapak® Simple™ system is true to its name and is the easiest to use foam-in-bag platform yet. The system merges the premium performance of Instapak® foam packaging with an on-demand delivery system that requires minimal operator training and service.

The Instapak® Simple™ system is small and can be easily transferred to remote packaging locations, making it ideal for operations producing less than 20 packs per day.

Benefits of Instapak® Simple™

- **Versatility** – suitable for packing a vast range of products
- **Just-in-time** – foam is expanded on site ensuring the right amount of material is used every time
- **Product protection** – superior cushioning abilities that provide maximum protection with the minimum amount of material
- **Space saving** – saving valuable warehouse space

Instapacker® Tabletop

The Instapacker® Tabletop™ system provides affordable foam packaging that combines proven reliability with the convenience and cost-effectiveness of the foam-in-bag process. The easy-to-use Instapacker® Tabletop system has an incredibly small footprint but can make a big impact on your shipping operations. Capable of producing up to 16 Instapak® foam-filled bags per minute, this versatile system can support the packaging needs of medium to high volume shipping operations, multiple pack station operations and even the production floor.

Benefits of Instapacker® Tabletop™

- **Maximum value** – This inexpensive, foam-in-bag system reduces material and labour costs.
- **Easy to use** – A simple touch key control panel virtually eliminates the operator's learning curve.
- **Compact** – Small, innovative design saves valuable workspace.
- **Flexible** – The Instapacker™ Tabletop system supports the packaging needs of shipping rooms, multiple pack station operations and even the production floor.
- **Protective** – Instapak® high-performance packaging foam is designed to protect your products during shipping, warehousing and general handling.

Instapak® Quick RT®

Instapak® Quick RT® foam packaging, provides users with a custom-fit protective cushion that is fast, easy-to-use and ideal for small-to-medium volume packaging:

Convenient, portable, protective foam cushions... anywhere instantly

- **Easy-to-Use:** Anyone can become a packaging expert – instantly.
- **Superior Product Protection:** Virtually eliminate shipping damage..
- **No system costs:** No installation or service required
- **Space saving packaging:**
Expand up to 27 times its original volume
- **Versatile:**
Protects products of almost any size, shape and weight.
- **Fast:** Expands in seconds to form custom-fit protective foam cushions.
- **Convenient:** Takes up little space and is completely mobile so you can use it anywhere.
- **Customer Satisfaction:** Product arrives in a neat professional package
- **Applications:** including Internet-based businesses, galleries, independent business owners, pack-and-ship stores, warranty repair depots, moving and storage facilities, retail shipping departments and mailrooms.

Different colours available

Manual, easy to use void fill system

Compact and lightweight, the FillPak® M is the ideal choice for non-industrial environments. Designed for manual use, this handy machine involves no knife or cutting mechanism. Instead a simple controlled tear is generated at the fanfold perforation. Manual users simply pull the required length of packaging and tear off.

Weight 4kg.

Product Code:
004705

Fast and flexible for individual pack stations

Dispensing up to 1.4m of paper per second, the FillPak® TT accomplishes tasks comparable with bigger, weightier machines.

Light and compact this handy machine can be powered by battery where no electricity supply is available.

The FillPak® TT involves no cutting. A simple controlled tear is generated at the fanfold perforation. Height adjustable and also available with table clamp or floor stand.

Weight 7.5kg.

FillPak Fanfold Paper For use with FillPak® M, FillPak® TT and FillPak® TT with Cutter

An effective, economic and environmentally friendly void fill solution. Perforated every 186mm.

Product Code	Type	GSM	Ply	Colour	Width (mm)	Length (m)	Pack Qty	Pallet Qty	Weight (kg)
003801	Fanfold	50	1	Brown	381	500	1	48	10

Ranpak FillPak® TT with Cutter

Compact choice for effortless void filling on-demand

The TT Cutter has all the benefits of the standard TT but with an automatic cut mechanism which makes it very appropriate for packing environments where there is a focus on ergonomics.

- User friendly – increased comfort for packer
- High output – 1.4m/sec converting speed
- EDS functionality – pre-set paper lengths
- Foot pedal option available

Protective

Ranpak FillPak®

The fastest end of line solution for filling boxes in high volume packing operations

FillPak runs at high speed (1.4 m/sec) using paper with a width of 76cm. This solution reduces the time needed for filling boxes offering maximum box throughput and an efficient packing process.

- On demand – paper dispensed at point of operation
- High speed – converts at 1.4m/sec
- Simple to operate – allows operator to focus on filling process
- Minimal downtime – up to 5 paper packs can be glued together for continuous operation

FillPak Paper

Product Code	Type	GSM	Ply	Colour	Width (mm)	Length (m)	Pack Qty	Pallet Qty	Weight (kg)
003800	Fanfold	50	1	Brown	762	500	1	24	20

Ranpak® PadPak® LC

Fast, economic system to protect fragile products

The PadPak® LC paper cushioning system combines high speed with minimal paper usage, converting 1.2m of paper per minute into a light, effective cushioning pad for efficient cushioning and wrapping. The LC can be operated by foot pedal or an operating panel. Height adjustable and tiltable, it allows the operator to adapt the converter to the workplace.

Product Code	Type	GSM	Ply	Colour	Width (mm)	Length (m)	Pack Qty	Pallet Qty	Weight (kg)
008956	Fanfold	70	1	Brown	762	360	1	24	20
008990	Fanfold	90	1	Brown	762	300	1	24	20

Ranpak® PadPak® CC

Compact Cushioning

The PadPak® CC dispenses cushioning pads only 11cm wide, allowing them to snugly fit around smaller contents. This means a smaller box can be used and, as a result, less packing material is required.

The compact pads are easy to handle and can be used for a wide range of applications. They are produced on-demand with no bin filling required.

PadPak CC Paper

Product Code	Type	GSM	Ply	Colour	Width (mm)	Length (m)	Pack Qty	Pallet Qty	Weight (kg)

Ranpak® PadPak® JR

High quality paper cushioning for users requiring flexibility

Protective paper cushioning on demand, ideal for lower volume packing in distribution centres, mailrooms, retail outlets and for home office use.

The PadPak® Junior is compact, portable and easy to use, producing 0.3m of paper per second, through an electric feed with manual cutting. Table top and pedestal options also available.

Weight 40kg.

PadPak Junior Paper

Product Code	Type	GSM	Ply	Colour	Width (mm)	Length (m)	Pack Qty	Pallet Qty	Weight (kg)
003794	Roll	70/70	2	Brown	680	160	1	20	15

The most versatile cushioning solution to protect heavy or fragile products

Ideal for high volume and labour-intensive packaging operations, the PadPak® Senior is supplied as either a stand-alone unit, integrated into a packing station operation, or built into a production line.

This flexible, height-adjustable micro-processor-controlled unit can convert 2 or 3-ply paper into cushioning pads on-demand, or pre-produced into a bin, at 0.42m per second.

With a range of user modes and automatic cutting, the Senior can also be pre-programmed to produce pads of differing lengths for packing complex products. The handy remote control clearly outlines all machine functions.

Optionally combined with Coiler and/or gluing plate. Weight 180kg.

Ad'Pad When packaging becomes advertising

Your packaging material can now be used to help realise your marketing goals. By adding a unique preprinted strip to the paper input, a packaging material is created that can communicate a customised message to the receiver.

As the concept is patented, only Ranpak can offer the unique ability to communicate via your protective material.

Loosefill Packing Chips

These Loosefill Packing Chips are ideal for filling voids once items have been packed into their outer shipping cartons.

- 100% recyclable and re-useable
- Produced without CFC
- Cost effective: extremely high yield, unlimited storage life and low density for reduced transportation costs.
- Ideal for fragile and irregular shaped items

Pelaspán® Bio Loosefill

PELASPAN® BIO is an innovation in the field of flowable padding materials (loose fill).

- 100% compostable
- Made of renewable raw materials
- Fast packaging guaranteed
- Excellent padding effect
- Light weight and free flowing
- Dust free, abrasion resistant
- Cost effective
- Can be used without prior training

Loosefill Dispenser and Frame

An essential tool in voidfill packing

Improve your packing operation by using a hopper kit that can deliver loosefill straight into the box. Can be used in conjunction with existing supports in your warehouse or used with a mobile frame.

Available in two sizes, the hopper kit includes scissor dispensing valve, trunking, pulleys, clips & cord.

Product Code	Description
007910	To fit 4 bags (60 cubic feet)
107008	Mobile Frame

Mesh Sleeving

A stretchy solution for awkward objects

Tubular, plastic stretch netting provides excellent protection against surface damage, scratches, scuffs and indentation in transit.

Particularly suitable for metal objects, this cost-effective packing solution is used by leading manufacturers and retailers to package and safeguard cylindrical and awkward-shaped items.

Available in a range of colours, weights and stretch capability, the sleeving is easily cut to the required length using scissors.

Plastic mesh netting is clean, dust free and environmentally friendly.

Mesh sleeving requires minimal storage space.

002611	100 x 100	60-80 mm	400
002633	100 x 100	80-100 mm	280

Foam Edge Protectors

Designed to absorb impact

Reusable, foam edge protection strips are recommended for protecting the corners and edges of furniture, equipment and machinery in transit.

Highly effective in absorbing shock impacts from knocks and bumps, Nomapack® strips are made from polyethylene foam and are available in U, L and O shaped profiles uniquely designed to fit snugly into place.

Supplied in 2m lengths that can be cut to size.

U Shape

Product Code	Wall Thickness (mm)	Colour	Size Suitable for Edges Between	Strip	Lengths Per Qty

001449	3	Brown	32/20 x 3	590
001450	3	Blue	33/26 x 3	460

Woodwool and Vermiculite

Versatile protectors with strong staying power

Woodwool

Versatile woodwool can be used either as void fill or made into cushioned pads for the safe protection of bulky or fragile cargo.

Woodwool can be used to pad out boxes of fruit and vegetables, as well as decoratively in food hampers and toiletries. It is also a traditional stuffing for soft toys and taxidermy.

Vermiculite

Vermiculite provides fireproof, lightweight void fill, which can easily be placed around irregular objects. Its high absorbency makes it an ideal packaging solution for liquid items and is UN approved for use in transporting hazardous materials.

When heated Vermiculite expands up to 30 times its original volume, converting into a granular material. It stands the full shock of impact, retaining full absorbency and protection.

Fibre-free and containing no irritants, Vermiculite does not require protective clothing in handling. It is also reusable (subject to damage) and recyclable where facilities exist.

Product Code	Type	Grade	Weight	Pack Qty
000053	Wood Wool GTE 1	Medium	20kg	1
000051	Wood Wool GTE 2	Fine	20kg	1
006890	Vermiculite	Lightweight	3.5 cu ft Bag	1

Turn unboxing into a great customer experience

For customers, the experience of opening a package from an online retailer is as important as their user experience on the website. Yet many retailers aren't taking full advantage of unboxing to promote themselves and impress their clients. Our research into online packaging found:

- 20% were not a good fit for the product
- 38% had no branding on the pack
- 15% used too much packaging
- 7% of products arrived damaged
- 4% of boxes were hard to dispose of
- 6% used too little packaging
- 30% had no returns information
- 5% were not easy to open
- 30% did not reflect the value of the brand

Talk to us about giving your customers the best unboxing experience

Paper

Corrugated Single Faced Paper

Excellent strength

A lightweight and environmentally friendly packaging material, corrugated paper is ideal for wrapping or packing between boxed products.

It can be layered or scrunched, providing excellent protection and cushioning. Our single wall papers are made from 90 gsm kraft paper with a 'B' Flute.

Corrugated rolls are made from recycled fibres and are easily recyclable and reusable (subject to wear and tear).

Kraft Ribbed Paper

High performance wrapping

Pure kraft paper is a strong, high performance wrapping paper, manufactured from sustainable sources. This makes it ideal for medium and heavy-duty packing tasks where high burst strength is required for lining or wrapping box contents.

Available in a variety of sheet and roll sizes, in 70 or 88 gsm.

Rolls

Brown Filla Paper Roll

An economy choice for voidfill packing

This economy paper is ideal for scrunching up as voidfill for a wide range of packaging.

Manufactured using recycled material, it can be recycled with other paper products and offers minimal waste, as you can cut what is required from the roll.

Wall mountable paper dispensers are available for quick and easy use.

Product Code	Size (mm x m)	Roll Weight (kg)	Pack Qty

Tissue Paper

Macfarlane tissue paper comes in a spectrum of shades and finishes.

Acid-free tissue paper is suitable for jewellery and silverware, as the items will not tarnish when wrapped.

Non-toxic tissue paper is suitable for use with food produce, since there are no toxins to pass on to the food.

Bleed-resistant tissue paper is the perfect choice for garment wrapping, as the paper will not run off or stain if it comes into contact with moisture.

Machine glazed (MG) tissue paper has a shiny appearance on one side, remaining matt on the reverse to provide contrast in wrapping. Not suitable for use with jewellery, silverware or fabrics unless acid free.

Machine finished (MF) tissue paper has a matt finish on both sides.

Selecting The Right Tape

Type of Tape	Description	Best For/Most Suitable Application	Adhesive Types
Vinyl (PVC)	<ul style="list-style-type: none"> • Matt Finish • Quiet coming off the roll • Slow release • Does not stretch • Can be torn by hand 	<ul style="list-style-type: none"> • Long term storage • Easy to apply with dispenser • Best used at 18-21°C 	<ul style="list-style-type: none"> • Solvent – best long-term adhesive
Polypropylene	<ul style="list-style-type: none"> • Shiny Finish • Difficult to tear, requires dispenser or knife to cut • Noisy coming off the roll • Quick release • Does stretch 	<ul style="list-style-type: none"> • Economical • High initial grab • Performs well in deep-freeze conditions 	<ul style="list-style-type: none"> • Solvent - best long-term adhesive • Hot Melt - solvent free adhesive • Acrylic - water-based adhesive (environmentally friendly)
Low Noise Polypropylene	<ul style="list-style-type: none"> • Shiny Finish • Slow release 	<ul style="list-style-type: none"> • Combines to strength of polypropylene with the noiseless aspect of vinyl 	<ul style="list-style-type: none"> • Solvent - best long-term adhesive • Acrylic - water-based adhesive (environmentally friendly)

Value Tapes – Polypropylene

The cost-effective option for eco-friendly packing

Our value tapes are made using 25-micron BOPP polypropylene film with a water-based, acrylic adhesive, making them both a cost-effective and environmentally friendlier option.

For exceptional performance with reduced noise, choose our low noise polypropylene tapes. These combine strength with speed and are quiet off the roll.

Standard Tapes

Product Code	Colour	Size (mm x m)	Tape Microns	Core Size (mm)	Pack Qty
000877	Clear	48 x 66	25	75	36
000650	Buff	48 x 66	25	75	36

Low Noise Tapes

003671	Clear	48 x 66	28	75	36
003670	Buff	48 x 66	28	75	36

Standard Tapes – Polypropylene

High performance with durable adhesion

Macfarlane's strong standard polypropylene tapes are renowned for their high performance, with on-going adhesion.

Manufactured using 25-micron BOPP polypropylene, in buff or clear shiny-finish, standard tapes come either with solvent-based adhesives, for long-term sealing, or hot melt adhesives, recognised for their versatile application, superior tensile strength and ultimate fixing power.

These standard tapes are hard to tear and therefore require a hand dispenser for cutting.

For top performance with a quieter release, choose low noise polypropylene packing tapes.

Hot Melt

Product Code	Colour	Size (mm x m)	Tape Microns	Core Size (mm)	Pack Qty

Eco Tape

200m acrylic polypropylene tape on a 50mm core. Made from 25mu polypropylene film, but with a stronger, more effective adhesive – 20gsm.

Over 3 times as much tape on a roll, meaning:

3 x FEWER cartons shipped to a customer

3 x FEWER cartons stored in customer warehouse

3 x FEWER rolls changed

Product Code	Colour	Microns	Size (mm x m)	Core Size (mm)	Pack Qty

Custom Printed Tapes

Raise your company profile with cost-effective advertising

Advertise your business and raise your company profile at minimum cost with these eye-catching, custom-printed packing tapes.

We can advise on the most suitable tape for your product application and quote for your specific needs. All you need to do is provide a copy of your company logo and our packaging experts will do the rest, arranging artwork and submitting a proof for your approval.

Choose up to four colours per tape design, in vinyl or polypropylene film, with standard or low tack adhesive.

Minimum order
72 rolls

Print Types

- Flood print**
eg: white base film, flood coated, text in dark blue.
- Positive print**
eg: white base film, printed.
- Reverse print**
eg: white base film, reverse printed.

Machine Applied Tapes

Quick release off the roll for fast bonding

Designed for use with automatic and semi-automatic tape machines, these specially manufactured packing tapes are suitable for use in the food industry.

The polypropylene construction and shiny finish provides quick release off the roll.

Printed Warning Tapes

A clear message for safe handling

These printed warning tapes provide dual-purpose protection for delicate or high value goods.

The clear message gives easily visible instructions on safe handling during transit and storage, while the tough adhesive tape ensures packages remain secure.

Printed tapes can also show where cartons have been opened or tampered with.

With a choice of seven messages, Macfarlane can also customise your individual warning message. Available in white printed PVC vinyl or low-noise polypropylene.

Low Noise Polypropylene

Reinforced Filament Tapes

Extra strength for heavyweight packaging

This extremely strong adhesive tape is reinforced with glass fibre filaments either down the length of the tape (single weave) or across and down the tape (cross weave). A popular solution for bundling bulky items and sealing or reinforcing heavy boxes, reinforced filament tape is also a widespread choice for packing in the steel industry as a replacement for steel and polypropylene strapping.

A packing knife or scissors is required to cut reinforced filament tape, offering tamper-evident qualities, as any cut will be easily noticed.

Product Code	Type	Size (mm x m)	Core Size (mm)	Pack Qty
003045	Single Weave Filament Tape	25 x 50	75	36

Tamper Evident Tapes

Plain and simple security for precious parcels

This cost-effective security tape is a plain and simple deterrent, offering clear visibility when a parcel has been tampered with.

One of Macfarlane's best-selling products, it adds a seal of security to high value parcels, display packaging, cash bags and computer software.

If the tape has been removed or tampered with, a 'void opened' message appears on the package surface. Once pulled away the tape cannot be reused or resealed without being noticed.

Product Code	Colour	Size (mm x m)	Pack Qty
008404	Red	50 x 50	24

Cloth Tapes

Black cloth, or 'gaffa' or 'duct' tapes are a professional, multi-purpose solution for heavy-duty sticking tasks.

The cotton mesh construction and waterproof finish, with super-strong, rubber compound adhesive, provides a lasting bond for a broad range of requirements, including rolled-up carpets and rugs, securing cables, temporary flooring, flooring protection and averting tripping hazards.

Product Code	Tape Material	Size (mm x m)	Core Size (mm)	Pack Qty
219296	Cloth	50 x 50	75	24

Floor Marking Tapes

A cost-effective solution for designated areas

Select your colour from this range of six floor-marking tapes manufactured for Macfarlane.

The general purpose vinyl adhesive tapes are visibly bright, extremely strong and provide a cost-effective option for factory and warehouse use, where designated areas need marking out for storage, walkways, truck routes, loading bays and any hazard spots.

Very long lasting and much easier and cleaner to apply than paints.

Product Code	Colour	Size (mm x m)	Core Size (mm)	Pack Qty
000325	Black/Yellow Marking Tape	50 x 33	75	24
000310	Green Marking Tape	50 x 33	75	24
000314	Grey Marking Tape	50 x 33	75	24
000320	Red Marking Tape	50 x 33	75	24
000321	White Marking Tape	50 x 33	75	24
000322	Yellow Marking Tape	50 x 33	75	24

Floor Marking Tape Applicator

A convenient way to mark out factory floors, sports halls, canteens, etc.

Applicator is suitable for tapes up to 100 mm wide.

Product Code	Pack Qty
005481	1 Unit

Double Sided Tapes

Coated on both sides with clear adhesives

Double-sided polypropylene tapes create firm tack, due to the hot melt glue used in the manufacture. A knife or scissors are recommended for cutting tape from the roll.

Double-sided tissue tapes are coated on both sides with a clear adhesive.

Our range of double-sided fingerlift tapes is manufactured with a hot melt glue recognised for versatile application, superior tensile strength and strong adhesion.

Product Code	Type	Size (mm x m)	Core Size (mm)	Pack Qty
006908	Double Sided Polypropylene Tape	50 x 50	75	24
000835	Double Sided Tissue Tape	25 x 50	75	48

Gummed Paper Tapes

Gummed inside and eco-friendly

Biodegradable and recyclable gummed paper tapes from Macfarlane provide an environmentally friendly alternative for standard packaging.

These hardwearing tapes are suitable for sealing all parcels and cartons.

Tapes require water to activate the adhesive. A paper tape dispenser is required to moisten, cut and dispense tape automatically.

Once removed from the box the tape cannot be resealed and therefore provides visible evidence of any tampering. It is also tolerant of storage temperature fluctuations.

Layflat Polythene Tubing

A versatile, budget packing solution

An amazingly simple, yet highly effective, budget packing solution with broad flexibility, in particular for protecting long length items such as piping, tubing and wooden mouldings.

Layflat polythene tubing can be used to make polythene bags to size by using a heat sealer.

Macfarlane's standard stock range of layflat polythene tubing is suitable for use with food.

Magneta Heat Sealers

The Sealmaster Magneta has a proven track record delivering failsafe, top quality performance.

In production for 25 years, this robust machine remains one of the world's most popular heat sealers. It can be operated by hand, or with the optional foot pedal and is equipped with a magnetic hold-down device, which ensures consistency, independently of the operator.

User-friendly and safe to handle, these machines are ideal for use with polythene, polypropylene, laminates and some foils. Using the inbuilt cutting device, they also work well with pre-made bags or lay-flat tubing material.

Product Code	Description	Seal Length (mm)

Heat Sealer with Cutter

This impulse heat sealer is manufactured for polythene up to 400 mm wide and has a 12-month warranty covering non-consumable parts and labour.

The sealers are ideal for use with lay-flat polythene tubing, producing bags to size for product packaging.

Impulse heat sealers use upper and lower heating elements.

This easy to handle heat sealer is designed to seal polythene bags or lay-flat polythene tubing up to 400 mm wide.

The machine comes with a 12-month warranty covering non-consumable parts and labour.

Pallet Top Sheets

A protective shield for stretch-wrapped pallets

Pallet top sheets are designed to protect stretch-wrapped pallets from wet weather and dust during transit and in storage. A warehouse essential, these tough-wearing sheets are supplied on a perforated roll for easy separation and handling.

To apply the polythene sheet, simply pull the stretch film to the top of the pallet, lay the sheet over, then add a further layer of stretch film, securing the polythene between the layers.

All pallet top sheets are supplied centre folded. The dimensions displayed show the width of the sheet opened out.

Product Code	Duty	Colour	Size (mm)	Sheets Per Roll
223759	Extra Light	Clear	1800 x 1800	500
003084	Standard	Clear	1800 x 1800	150
002694	Heavy	Black	1800 x 1500	150
003083	Heavy	Clear	1800 x 1800	150

Centrefold Polythene Sheets

Tough cover-all against dust and moisture

These general purpose polythene sheets are designed to protect items in storage from dust and moisture.

Sheets are unperforated to provide maximum value and minimum waste, allowing you to cut to the size you need, for which we recommend using a packing knife.

Supplied centre folded for ease of handling, the polythene sheet dimensions described show the width of the sheet opened out.

Product Code	Duty	Width (m)	Length (m)	Pack Qty
000728	Light	2m folded to 1m	150	1 Roll
000729	Light	4m folded to 2m	75	1 Roll
000311	Medium	2m folded to 1m	100	1 Roll
000312	Medium	4m folded to 2m	50	1 Roll
000315	Heavy	2m folded to 1m	50	1 Roll
000316	Heavy	4m folded to 2m	25	1 Roll

Polythene LDPE Centrefold Shrinkable Film

Dust, dirt & waterproof protection for transit & storage

LDPE shrink wrap films keep products and pallets dust, dirt and water free during transit and in storage.

Sealing around loads requires a shrink film heat system. A shrink film dispenser is also recommended for fast application and storage of shrink film rolls in use. All LDPE shrink films are supplied on a centre-folded roll for easy use. Dimensions show the width of film opened out.

100% recyclable. Manufactured from virgin material making LDPE shrink film safe to use with food.

**Food
safe**

Shrink Wrap Pallet Covers

Clear cover adds protection from the elements

MADE FROM
100%
recyclable
materials

Shrink wrap pallet covers provide protective cover from wet weather, dirt and dust in transit and storage, while the transparent polythene construction enables easy identification of the contents.

To use, simply place the pallet cover over the pallet, which acts as a bag. Use a heat shrink film gun to shrink the cover to a tight fit for the pallet and contents.

Super heavy-duty shrink film pallet covers are supplied on a roll as gusseted sacks and perforated for easy removal from the roll.

Bespoke sizes available

- To calculate the size of gusseted pallet cover needed, measure:**
- Length of pallet load plus 75mm
 - Width of pallet load plus 100mm
 - Height of pallet Load plus 50% of width plus 100mm

Product Code	Cover Size (mm)	To Fit Pallet Size (mm)	Open to Dimensions (mm)	Covers Per Roll	Pack Qty

Ripack 2200 Shrink Film Gun

Easy to handle, fast and reliable shrink-wrap system provides extensive heating over in short shrinking time to reduce operating costs. A 360-degree rotating nozzle and adjustable regulator controls power to suit all types of film.

Safety features include total gas safety guard, dead man device and patented cold nozzle technology. Includes case and regulator hose.

Suitable for use with LPDE shrink film and pallet covers.

Product Code	Description
006911	Ripack 2200 Shrink Film Gun

Economy Shrink Film Gun

Cost-effective and easy to use, this heating gun includes regulator with safety cut-out and anti-kink swivel joint.

Fitted with eight metres of safety hose.

Full instructions and tool kit included.

Suitable for use with LPDE shrink film and pallet covers.

Shrink Wrap Films – PVC

Attractive presentation with easy handling

PVC shrink film wrap is suitable for most types of packaging and particularly enhances the look and sales appeal of gift and retail products like toys, games, CDs and DVDs, stationery and many other items.

Macfarlane's range of light, medium and heavy-duty PVC shrink films are supplied on a centre-folded roll for easier handling.

Shrink Wrap Films – Polyolefin

Polyolefin shrink film is not as corrosive as PVC shrink film, and has a higher yield and clarity. It is also stronger, more flexible and can withstand lower storage temperatures.

This product aids machine usability by creating less build up of material on machine sealing wires, whilst being compatible with manual, semi and fully automatic machines.

Another benefit – Polyolefin shrink film does not give off harmful gasses which could be hazardous to the environment.

Handywrap Mini Reel	121
Machine Applied Stretch Film	122
Stretch Machines	123

Stretch

Understanding Different Types of Film

Blown Stretch Films

Blown stretch films are typically used for heavier irregular loads and applications requiring excellent puncture and tear resistance. Additives are used to provide excellent cling and superior load stabilisation characteristics. As a result, blown stretch films can be noisy as reels are unwound. See page 119 for blown stretch films.

Cast Stretch Films

Cast stretch films provide a smooth surface with excellent optics, gloss, strength and cling without additives. See page 120 for hand-applied cast stretch films and page 122 for our machine cast stretch films.

Pre-Stretch Films

Pre-stretching involves stretching the film during manufacture. The process can increase film strength, improve load stability, reduce the volume of stretch wrap film needed and subsequently save on stretch film packaging costs. We offer a range of pre-stretched stretch films designed to achieve optimal pre-stretching results that can be used with stretch wrap machines and manual application operations. Key benefits experienced from using pre-stretched films include:

- Reduced wastage
- Faster wrapping
- Improved health and safety for users

See page 122 for pre-stretch films.

Selecting The Best Stretch Film For Your Requirements

When selecting stretch films consider the following:

Performance

Selecting a stretch film that provides the right yield strength and performance for the loads being wrapped is crucial. The yield strength denotes the amount of stress a stretch film can withstand without permanently having plastic deformation. Prior to reaching the yield point, a stretch film will elastically deform but return to it's original shape once the stress is removed.

We've categorised our stretch films by strength:

	Hand-Applied Blown or Cast Film (mu)	Hand-Applied Pre-Stretch Film (mu)	Machine Film (mu)
Extra Light		6	12
SuperLight			15
Light	11	11	17
Medium	14		20
Heavy	16		23
Super Heavy	19		30
Ex Super Heavy	28		

Products

Consider the products being wrapped. Also look at the weight load (typically per pallet), the load profile as described below, and the transit process the load will experience.

Time, Use and Cost Use

Hand wrapping is best suited for smaller or sporadic stretch film wrapping requirements. Introducing machine wrapping may ultimately save time, resources and packaging materials.

Overlapping

This is a technique for covering the top of your pallet using polythene top sheets (see page 112 for top sheets). This protects your products and provides a downward force on the pallet load. When overlapping hand applied films, it is recommended users allow up to a 50% overlap. If using machine applied films, users should allow a 50 mm overlap, regardless of the film width.

Banding

This refers to applying multiple wraps of stretch film to a particular area of a pallet to reinforce the load or band multiple units together.

Neckdown

This happens when a film loses its dispensing roll width and narrows down while being stretched. Neckdown reduces the coverage each wrap provides thereby making it likely that more wrap rotations and more film will be needed to wrap a load or pallet.

Are You Using The Best Film For Your Requirements?

Before selecting a stretch film, we'd recommend you measure your current usages and review your application. The best way to calculate your usage is to look at your stretch yield in metres and your yield costs in weight. This enables you to calculate the effectiveness of your stretch wrap by calculating the cost to wrap a pallet. Still not sure? Contact us to review your requirements.

Hand-Applied Stretch Films

Hand-applied stretch films are used for manual stretch wrap packaging application.

All hand-applied stretch films are supplied on standard cores for use with hand-applied applicators or extended cores.

- Always place the outside of the film to the pallet surface
- Secure film to the pallet before wrapping by tying to the pallet base
- Always ensure the film covers the base of the pallet and the bottom layer of the load
- Wrap the bottom of the pallet at least twice to secure load
- Overlap film by 30% to 50%
- Depending on the weight of the load, consider wrapping the pallet twice
- To maximise strength use the film horizontally to create a 'strap'

Hand-Applied Blown Stretch Film

Manual stretch wrapping for heavy or irregular loads.

Demonstrating savings on stretch wrap

At Macfarlane Packaging we help customers reduce cost and material usage throughout their entire packaging range

We conducted a stretch health check with our customer who had recently invested in 5 core break stretch wrap machines but were using a power pre film, this meant that the 24 micron cast film they were using did not stretch as well as it should. They were using 705 grams of film to wrap each pallet.

We ran a comparison with two other films - 7 and 9 micron. Tests recommended that we replaced their existing product with

the 9 micron Pre Stretch performance film which offered a much better load stability. This switch resulted in a yield improvement of **314% - wrapping 588 pallets per tonne vs 142 pallets** per tonne with the existing stretch wrap. The weight of stretch used on each pallet dropped to 170 grams, this offered an overall saving of 56% on stretch wrap spend.

The stretch health check not only took cost out of the operation but reduced waste packaging, improved carbon footprint and increased productivity – less roll changes were required on the stretch machine.

What could a stretch health check deliver for you?

Talk to us about a more sustainable supply chain

Phone: **0800 2888 444** Online: www.macfarlanepackaging.com

Hand-Applied Stretch Film Dispenser

For use with 400 or 500mm width films and 38 or 50mm ID Cores.
Suitable for use with blown or cast films.

Machine Applied Stretch Films

Machine applied stretch films are extremely strong and versatile, saving time, resources and packaging materials for high performance applications requiring higher tensile strengths.

These films have excellent puncture resistance, good cling, slip and load retention.

Cast stretch wrap films provide a smooth surface with excellent clarity, gloss, strength and cling, without additives. Machine-applied stretch films are suitable for use on power pre-machines up to 250% stretch.

Power Pre-Cast Stretch Film

Smooth-action clarity, gloss, strength and cling, with no additives.

Dispensing Stand For Plastic Reels

Handy dispenser, with inbuilt stand and handgrip, for polypropylene strapping on a plastic reel.

Product Code	Description	Pack Qty
001849	For use with plastic core strapping	1

Strapping Dispenser Trolley

Pull-along dispenser for plastic reels, on a sturdy stand, including useful tray for tools and seals.

Product Code	Description	Pack Qty
001115	For use with plastic core strapping	1

Strapping

Plastic Edge Protectors

These wrap-around plastic edge protectors are designed for use with polypropylene and polyester strapping.

Product Code	Size (mm)	Pack Qty
001311	25 x 25	2,000
001310	40 x 40	1,000

Buckles

The simple buckle device secures polypropylene or polyester strapping by pulling the strapping through the buckle. Available in metal or plastic, buckles offer an alternative to seals with low tension. A tensioner tool is required.

Product Code	Description	Pack Qty
001307	Plastic Buckles (12 mm)	2,000
001312	Metal Buckles (12 mm)	1,000
001313	Metal Buckles (16 mm)	1,000

Seals

A range of semi-open and serrated seals for use with polypropylene and polyester hand strapping.

Semi open strapping seals allow the seal to be placed along the strapping for secure sealing. Seals must be applied with sealer and strapping tensioner or combination tool.

Serrated strapping seals have serrated teeth on the inside of the seal, allowing serrated seals to grip strapping securely and improve the breaking strain.

Product Code	Seal Type	Size (mm)	Suitable Strapping	Suitable Sealing Tool	Pack Qty
002733	Standard Semi-Open	12 x 25	12mm Polypropylene	Economy Combination Tool	2000
002745	Heavy Semi-Open	12 x 32	12mm Polypropylene or Polyester	ST-IMPA Combination Tool	2000
001316	Heavy Semi-Open	16 x 32	16mm Polypropylene or Polyester	ST-IMPA Combination Tool	2000
000017	Serrated	12 x 30	12mm Polypropylene or Polyester	ST-IMPA Combination Tool	1000
001332	Serrated	16 x 30	16mm Polypropylene or Polyester	ST-IMPA Combination Tool	1000

Standard Tensioner Tool

Gain a tight fit on strapping with this standard tensioner tool that can be used vertically or horizontally.

For use with polypropylene strapping up to 16mm wide.

A sealing tool is also required.

Product Code	Description
001549	Use up to 16mm Strapping

Standard Sealer Tool 12mm

Long handled sealing jaws allow maximum seal strength to be achieved with minimum physical effort.

Product Code	Description
001552	Use 12 mm Strapping
000669	Use 16 mm Strapping

Combination Tools

Versatile, all-in-one strapping tools that enable you to tension, seal and cut strapping in one action.

Product Code	Description	Use with
000805	Economy Combination Tool	12mm Strapping
000491	ST-IMPA Combination Tool	Up to 16mm Strapping

Friction Welder

Battery Strapping Tool with adjustable functioning mode which can be set as Automatic, Semi-automatic, Manual and "Soft". Easy to use and simple to adjust it can be used for both vertical and horizontal strapping. It tensions, cuts and seals at the touch of a button.

Product Code	Description	Model Number
220963	Friction Welder	GT-SMART

Strapping

Polypropylene Machine-Applied Strapping

Other
colours
available

Machine-applied polypropylene strapping is ideal for bundling products, magazines/newspapers and packages together, or securing individual cardboard boxes.

Light, flexible and easy to handle, it offers excellent performance and reliability for most strapping tasks, with no staining or rusting of the product or package.

Manufactured in white and supplied on a cardboard core, with approximate breaking strains from 100 to 135kg. Available in semi-auto and fully-auto machine formats.

Hand-Applied Polyester Strapping

Polyester strapping is an extremely strong, yet soft, lightweight and weather-resistant alternative to steel strapping.

Polyester strapping takes 2.5 times more energy to break than steel strapping with the same break strain. An 'elastic memory' maintains tension even where there is pack settlement or shrinkage.

There are no sharp edges, creating a safer working environment and also reducing the potential for product damage compared with steel strapping.

Product Code	Description	Length (m)	Width (mm)	Strapping Thickness	Approx. Breaking Strain (kg)	Core (mm)	Pack Qty
001340	Hand-Applied	2500	12	0.06	310	406 x 152	1
007889	Hand-Applied	1500	15.5	0.07	450	406 x 152	1

Hand-Applied Coded Polyester Strapping

A soft, lightweight, strong and weather-resistant alternative to steel strapping. With textured finish for ultra-firm grip.

Product Code	Width (mm)	Length (m)	Approx. Breaking Strain (kg)	Pack Qty
004745	13	1500	380	2
004746	16	1200	460	2

Ribbon Wound Steel Strapping

Steel is traditionally the strongest type of strapping available and remains widely within the construction sector. It has the highest tensile strength of any strapping material.

Product Code	Width (mm)	Length (m)	Approx. Breaking Strain (kg)	Pack Qty
000412	13	330	518	1
000425	16	334	652	1
000432	19	334	775	1

Oscillated Steel Strapping

Steel strapping wound in a tight, uniform pattern for added strength.

Product Code	Width (mm)	Length (m)	Approx. Breaking Strain (kg)	Pack Qty
004824	13	965	518	1
005196	16	763	652	1
003141	19	533	930	1

Strapping

Oscillated Steel Strapping Dispenser Trolley

Wheel-along trolley accommodates steel strapping reels from 13mm to 19mm wide, for easy packing in situ.

Product Code	Description
002707	Oscillated Steel Dispenser Trolley

Overlap Seals

Closed seals for use with up to 19 mm steel strapping.

Product Code	Width (mm)	Pack Qty
001416	13	1000
001417	16	2500
001418	19	2000

Snap On Seals

Snap on strapping seals are designed for use with steel strapping and provide a semi open seal, which snaps on to hold the strapping securely in place.

Product Code	Width (mm)	Pack Qty
001224	13	1000
001226	16	1000
001227	19	1000

Steel Strapping Sealer Tool

Easy-grip, essential tool specially designed for use with steel strapping.

Product Code	Description	Pack Qty
001233	For use with Steel Strapping up to 13 mm	1
001234	For use with Steel Strapping up to 16 mm	1
001235	For use with Steel Strapping up to 19 mm	1

Steel Strapping Safety Cutter

Strong, high-performance safety cutters designed for use with steel strapping.

Product Code	Description
001237	For use with Steel Strapping

Steel Strapping Tensioner Tool

A handy tool that creates the right, tight fit for steel strapping.

Product Code	Description
001236	For use with Steel Strapping.

ST-IMAG Combination Tool

This high quality combination tensioning and sealing device is designed for use with 13mm, 16mm and 19mm steel strapping, to a maximum gauge of 0.6mm.

Product Code	Description
004404	For use with 12mm Steel Strapping
000663	For use with 16mm Steel Strapping
000668	For use with 19mm Steel Strapping

Strapping

Ribbon Wound Dispenser Trolley

Robust wheeled trolley designed for use with ribbon wound steel strapping from 13mm to 19mm wide.

Product Code	Description
001238	Ribbon Wound Dispenser Trolley

Our service can be as tailored as our products

Our services have been developed to support business growth, protect profits and enhance brand perception. Innovative and flexible, we will tailor a service that's right for your business. Services include:

- Inventory Management
- National Account Management
- Speeding up your packing operation
- Reducing shipment damages
- Cost Reduction
- The Innovation Lab
- Online Order Management
- Design and Manufacture

Industrial Shelving

Solid storage designed for heavy loads

High quality, strongly constructed industrial shelving provides generous storage, designed to support heavy loads.

We offer a range of bolt free, easy to assemble shelving systems, with up to 5 shelves. Shelves slot easily into place with wide gaps between each tier to accommodate bulky boxes, tools and equipment. Ideal for warehouse, packing room and all industrial environments.

Load capacity varies from 175kg – 300kg; please refer to the product table below.

When assembling the shelving a rubber mallet is the best tool to be used.

Product Code	Size mm (H x L x W)	Max Load (kg)	Shelves	Pack Qty
001281	1760 x 900 x 300	175	5	1
001250	1760 x 900 x 450	175	5	1
001277	1760 x 900 x 600	175	5	1
001147	1760 x 900 x 300	265	5	1
001223	1760 x 900 x 450	265	5	1

001299	1980 x 1525 x 610	640	4	1

Shelving Bay Connectors

Firm support for your shelving system

Used to secure and hold multiple shelving units in place.

In packs of six, to support 150kg load to 300kg load.

Galvanised to prevent rusting.

Product Code	Description	Pack Qty
001249	Joining Pins for 175kg/265kg Shelving	4
	Tie Plates for 420kg/640kg Shelving	4

Chrome Shelving

Polished stacking,
ideal for display

This multi-purpose, bolt-free wire shelving with an attractive chrome finish will slot into most working environments and is ideal both for display and storage.

The four open tiers provide free airflow, preventing moisture build up.

Product Code	Size mm (H x L x W)	Max Load (kg)	Shelves	Pack Qty
007236	1625 x 1830 x 610	150	4	1
001130	1600 x 1220 x 355	175	4	1
001327	1600 x 1220 x 455	175	4	1
001261	1600 x 1220 x 610	175	4	1
001354	1600 x 915 x 355	200	4	1
001231	1600 x 915 x 455	200	4	1
001330	1600 x 915 x 610	200	4	1

Shelf Labels and Card Inserts

Spot-on identity check

Macfarlane shelf-edge labels allow quick and easy identification of locations on shelving and pallet racking.

In a choice of self-adhesive or magnetic backings the labels come with a handy, pull-away front for easy loading and amending information.

Self-adhesive labels provide permanent fixing. Magnetic backed labels offer flexibility of location and are also effective in cold storage areas.

Barcodes can be easily scanned through the clear plastic front without removal.

Product Code	Type	Size (mm)	Pack Qty
001396	Self Adhesive	38 x 100	100
001397	Magnetic	38 x 100	100

Accessories

Standard Packing Station

A perfect workbench for packaging

This multi-purpose packing station incorporates a broad workbench, plus three sturdy shelves, and is ideal for completing the packaging process. The floor and shoulder-level shelves add storage for packing tools and materials.

Can accommodate loads of up to 200kg.

Product Code	Size mm (H x L x W)	Max Load (kg)	Shelves	Pack Qty
001137	1675 x 1830 x 760	300	4	1
001522	1525 x 1220 x 915	300		1

Do Not Stack Cones

Do Not Stack Cones are an effective way to prevent shipping and storage damage by easily identifying and stopping the pallet of goods being stacked. Simply secure the cone with strapping or tape.

Product Code	Description	Pack Qty
216142	Do Not Stack Cones	25

Inka Presswood Pallets

Protection that saves on space – anywhere in the world

Inka Presswood pallets combine 85% natural wood fibre with a man-made resin. Moulded at high temperature to provide a smooth, solid base which also protects loads from moisture and contamination.

Inka Presswood pallets are compliant with quality standard accreditation on heat-treated products ISPM15 (International Standards for Phytosanitary Measures).

The nesting feature of this pallet saves over 50% of storage space when not in use. The rounded corners, with no nails or screws, are not only safer but also create an ideal surface for shrink or stretch wrapping. The moulded finish provides a solid top deck for ultimate box protection.

Product Code	Reference	Size (mm)	Approx. Load Guide (kg)	IATA Reference
000615	F44	400 x 600	200	–
001094	F64M	600 x 800	500	1/2 Euro

003300	Industrial Scissors with Serrated Blade	5
003220	Industrial Scissors with Comfortable Handle	5

Tape Measure

5 metre tape measure.

Product Code	Pack Qty
003060	5

Black Marker Pen

This chunky, black permanent marker is the perfect choice for marking up boxes.

Product Code	Pack Qty
001335	10

Accessories

Glue Guns & Adhesives

Gain speedy and accurate application with staying power, using this high performance range of glue guns.

Hot melt glue guns are essential to heat glue to melting point, applying adhesion to the exact spot, swiftly and with maximum ease.

All hot melt glue guns come with a 12-month guarantee and full after-sales service when used with hot melt glue sticks supplied by Macfarlane.

The **SL120** Glue Gun uses 12mm glue stick and operates at 240V.

- Dispenses 12mm hot melt up to 33g/min
- With 'power-on' LED light display
- Comfortable grip and long trigger for added operator comfort
- Stick Size: 12 mm

Product Code	Pack Qty
251389	1

The **SL300** Glue gun uses 12mm glue stick and operates at 240V.

- Industrial tool dispenses 12mm hot melt up to 1500g/Hr
- Easy change thermostat values for low melt glues
- Ergonomic design with 'soft feel' handle and adjustable trigger stroke
- Glue adjuster screw for controlled glue dosage
- Stick Size: 12mm

Product Code	Pack Qty
251391	1

The **GX600** High output glue gun, variable operating temperature, uses 43mm glue sticks and operates at 240V.

- High capacity 250ml glue chamber
- Magnetised foot for stability when not in use
- Temperature control dial to suit glue type and application
- Requires no compressed air supply and is ergonomic and lightweight

Product Code	Pack Qty
251394	1

Tacky when heated, setting fast when cool, hot melt glue is an effective adhesive that hardens within just a few seconds of application, providing a tough, resistant bond.

Commonly used in manufacturing, woodworking and art and craft hobbies, hot melt glue is also an effective alternative to packing tapes for sealing cardboard boxes.

Warning:

Hot melt glues can scald, causing burning and blisters.

Always check the heat sensitivity of material before applying.

Product Code	Adhesive Colour	Description	Use with	Size (mm)	Unit (kg)
000332	Clear	Fast setting adhesive	SL120 Glue Gun	12 x 300 Stick	5
000323	Brown	Fast setting adhesive	SL300 Glue Gun	12 x 300 Stick	5
000343	Brown	Fast setting adhesive	GX600 Glue Gun	43 x 43 Cartridge	5

Floor Markers

Floor Graphic Markers

- Permanent Adhesive
- High visibility floor graphics to highlight warnings and operational hazards
- Graphics printed on the underside of a clear PVC film
- Signs withstand everyday warehouse traffic
- 450mm diameter

Product Code	Description	Pack Qty
283337	Floor Marker 430mm dia. Forklift Truck Area	1
283338	Floor Marker 430mm dia. Pedestrian Traffic	1
283339	Floor Marker 430mm dia. Fire Exit	1

Rack Sacks

Easy collection and segregation of warehouse waste

- Simple fixing and trouble-free handling, supplied with two strong "S" hooks
- Suitable for shelving 900mm to 1100mm deep
- Made from tough waterproof polyester with carrying and emptying handles
- Special prints including company names and logos can be printed. Call for information

Product Code	Description	Pack Qty
283340	Green Racksack, each-General Waste	1
283341	Green Racksack, each-Mixed Paper and Card	1

Packing Station Sack

- Easily organises waste packaging materials
- Fits by hooking over the sides or can also be secured via eyelets in the top corner
- Manufactured from tough woven polyester
- Suits trolleys up to 580mm wide
- Single pocket – 600 x 600 with a capacity of 50L
- Double pocket – 600 x 600 with a capacity of 55L

Product Code	Description	Pack Qty
283342	Single Pocket Trolley Sack, Single Unit	1
283345	Double Pocket Trolley Sack, Single Unit	1
283343	Self-Adhesive Fixing Hooks	2
283344	Self-Adhesive Fixing Hooks	10

Presentation and retail packaging

Our service is totally bespoke, matched precisely to your needs.

We source from leading manufacturers the world over but whether it's from the UK or the Far East, we never compromise on quality or value. Our partners share this commitment to deliver exactly what we promise.

With a network of nationwide distribution centres across the UK and Ireland – that's over 700,000 square feet of warehouse space – an extensive state-of-the-art transport fleet, and the latest in journey-planning software, you can count on Macfarlane for:

- Reliable pre-arranged deliveries direct to your stores
- Next day delivery to meet seasonal and unexpected requirements
- Logistical support to give you more selling space and merchandise storage

Product range

- Carton folding board
- Rigid boxes
- Collapsible magnetic boxes
- Luxury retail bags
- Plain and printed tissue papers
- Mailing pouches

Finishing options

- Film lamination – gloss, matt, satin, soft touch
- Spot UV varnish – gloss, matt, textured

eCommerce packaging

We'll work with you to reduce costs and deliver an excellent customer experience.

Balancing customer experience whilst managing supply and demand in an online retailing operation is becoming increasingly complex and can be costly.

Our innovative approach focuses on solving problems with packaging solutions that deliver speed, accuracy and product integrity. We do this by focusing on both products and processes to deliver cost-effective and environmentally friendly packaging solutions.

Shelf ready packaging

Shelf ready packaging should offer great product protection in transit, be easy to open on store arrival and provide instant brand recognition to the shopper. Our experienced team are on hand to develop the right packs to showcase your products.

Our innovative approach focuses on delivering packaging solutions that not only ensure that your brands stand out, but that the packing process is as efficient as possible.

Custom transit packaging

Custom designed and printed boxes	156
Printed tape	159
Custom size and printed polythene	159
Pallets	160
Custom pallet security	160

Custom transit packaging

Good transit packaging should offer so much more than basic product protection.

Through innovative design a well thought out packaging solution can speed up the packing process, ensure product integrity and potentially reduce shipping costs.

Changes in packaging dimensions can improve pallet yield, increase payload and reduce the amount of packaging material used - a big win for carbon footprint reduction.

A custom pack helps to convey the value of your goods - demonstrating the quality of your brand and workmanship. It can also deter pilfering as it's less easy to replace with a generic product.

Custom designed and printed boxes

Packaging can be designed to fit your goods on completion or, to be built around your products as they make their journey through the production line.

Transit packaging can be as bold or discreet as you like.

Printed tape

A low cost way to brand your transit pack and deter against pilfering.

Custom size and printed polythene

Printed polythene is available in sheeting, layflat, bags and pallet cover formats.

Pallets

We offer a full range of pallets made to your specifications. Pallets are available in timber, plastic or corrugate.

Custom pallet security

Printed strapping deters theft as it cannot be easily replaced with generic product.

Strapping	166

Automation

We offer a full range of automation solutions to take your business to the next level.

Of course, automation improves productivity, but it can also reduce costs in so many other ways. Most of the Significant Six – the packaging costs that could be hiding throughout your operation – can be reduced by automation. It can save you space, time and reduce transport costs while preventing damage to shipped goods and to your reputation.

Auto boxing

Imagine lidding, sealing and labeling done automatically. All your packer has to do is put the goods into a tray.

This solution could dramatically reduce your packing area - some clients report a 50% reduction in space. Because boxes are sized around your products there is also a reduction in transportation costs.

Auto bagging

Your products are automatically sealed in addressed packs in a fraction of the time of manual packing. As this automation reduces the need for pack benches it dramatically reduces the space required for your packing area.

Air cushioning

Bubble wrap can be bulky to store, but with cushioning inflated on demand packaging storage space can be dramatically reduced. Material costs can also be managed as dispensers can be programmed to issue a set length of void-fill.

Foam cushioning

You can ensure product integrity by making a custom cushion pack that moulds perfectly to your items on demand - eliminating the need to store bulky cushion packs on site.

Paper cushioning

Typically paper cushioning machines require minimal room and are quick and easy to install - one block of paper can replace around three bags of loose fill.

Automatic tapes

Automatic tape machines can be programmed to dispense pre-set lengths of tape, speeding up the packing process and ensuring increased yield from your tape.

Semi or fully automatic case tapers simultaneously apply pressure-sensitive tape to the top and bottom seams of packed cartons.

Stretch wrapping

Automatic stretch machinery is fast, prevents film breaks and optimises yield of your stretch film. Also, because it is automatic, your team can be busy collecting the next pallet while the wrapping takes care of itself.

Shrink wrapping

A wide range of semi and fully automated pack solutions are available to speed up your packing operation.

Offering flexibility to pack any length of product, these systems reduce material waste and maximise your packaging yield.

Strapping

Automated strapping machines speed up throughput and ensure consistency of application to guarantee load containment.

These spaces are crucial to any business. You need them to be efficient and flexible to react to peaks in demand.

We have lots of solutions to help you speed up throughput, reduce costs and deliver the best customer experience.

Shelving

Sturdy shelving solutions are a great way to organise a packing area and maximise floorspace. We can help identify the best fit for your space.

Pick bins

These help reduce pick times as you create a more efficient pick and pack area. Temporary corrugate solutions are available, giving you the option to flat pack and store them through quieter periods. Our experienced team can talk you through the options available.

Shadow packing boards

These simple to use guides help your packers quickly identify the right size box to ship products in the most cost effective way. They are custom made to suit your product lines.

Packing station

An ergonomic packing bench can speed up packing times. We offer standard benches or can create bespoke solutions to suit your business.

Turn unboxing into a great customer experience

For customers, the experience of opening a package from an online retailer is as important as their user experience on the website. Yet many retailers aren't taking full advantage of unboxing to promote themselves and impress their clients. Our research into online packaging found:

- 20% were not a good fit for the product
- 38% had no branding on the pack
- 15% used too much packaging
- 7% of products arrived damaged
- 4% of boxes were hard to dispose of
- 6% used too little packaging
- 30% had no returns information
- 5% were not easy to open
- 30% did not reflect the value of the brand

Talk to us about giving your customers the best unboxing experience
