

# The big book of protective packaging

Everything you need, protected

Millions of products move more sustainably every day as we continue to lead change in protective packaging.

Our innovative products and solutions add value while reducing CO<sub>2</sub>. We're changing processes, changing materials and changing minds to enable businesses to plan for a better future.

Everything you need, protected.

# Helping you make an informed choice

The role of good packaging is to protect your products. If your packaging is doing its job, it will limit your impact on the environment. We can help you with environmentally friendly packaging materials that reduce waste in your supply chain and lower your carbon emissions.

## The right pack

Good packaging must be carefully planned from the start to reduce waste and support sustainability. The ideal sustainable packaging provides maximum protection with minimal use of material.

We apply the 3Rs – **reduce, reuse, and recycle**, as part of our approach to packaging.

### Smaller footprint

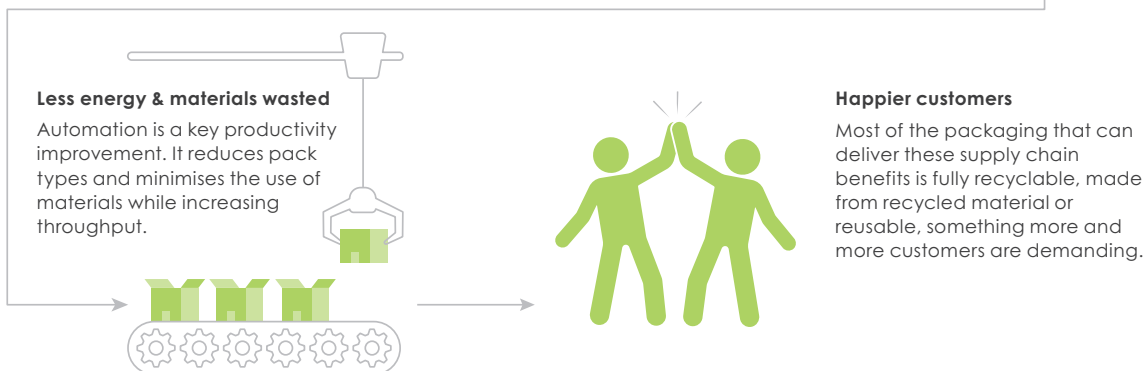

The right choice of packaging materials and JIT delivery can eliminate waste, reducing your packaging footprint and saving space.

### Less CO<sub>2</sub>

Lighter, smaller packs mean pallet optimisation, which can reduce the number of journeys you take, reduce load weight and cut fuel use and emissions.

### Half the environmental cost

Better pack design reduces damages. Each time damaged goods are replaced the carbon cost of a transaction increases.

### Less energy & materials wasted

Automation is a key productivity improvement. It reduces pack types and minimises the use of materials while increasing throughput.

### Happier customers

Most of the packaging that can deliver these supply chain benefits is fully recyclable, made from recycled material or reusable, something more and more customers are demanding.

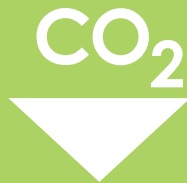

# The Macfarlane Packaging Steps to Sustainability

We know that eco-friendly packing materials can play a huge part in corporate and sustainability goals for businesses, with many looking to reduce packaging use and minimise material waste.

We can help you take your sustainability to the next level when it comes to packaging. Our approach will identify the impact packaging has on your operation and redress its impact throughout the supply chain.

## 1. Talk to us about your sustainability goals

We can help identify the key environmental costs in your packaging operation and help you reduce or eliminate them.

## 2. Identify sustainable packaging alternatives

We will recommend opportunities to reduce, reuse or recycle, and reduce material use.

## 3. Assess the knock-on effect of packaging

We will look at reductions in shipment weight, product damages and return rates. We'll help you reduce your fleet (or courier) carbon emissions.

## 4. Illustrate and report savings

We'll help you calculate and report reductions so that you can share the improvements with your customers and stakeholders.

Take the first step by contacting us today on: [0800 2888444](tel:08002888444)

## Environment policy

At Macfarlane Packaging, we are committed to reducing the impact of our activities on the environment.

Packaging is an essential commodity for most businesses and, used properly, can reduce waste by protecting products in transit.

Scan me to find out more about our commitment to sustainability

### We are committed to helping you to:

- 1 Use the minimum amount of packaging material possible, eliminating where possible.
- 2 Deploy the most efficient packaging products available.
- 3 Re-use packaging materials wherever possible.
- 4 Use packaging that is reusable, recyclable or made from recycled material.

In these ways we seek to ensure that your products are fully protected while using packaging in a responsible way.

Look for our FSC® Certified products.

FSC® is available on request.

## The Macfarlane Packaging Environmental Impact Rating

The Environmental Impact Rating bar accompanies every product entry in this book. It is part of our commitment to helping you make informed choices about packaging and the environment. The guide on this page gives you a more detailed explanation of the symbols' meaning and origin.

### OPRL recycling logos

Macfarlane Packaging is a member of the OPRL (On-Pack Recycling Label) scheme. The scheme is UK wide and tells you how easily a labelled pack can be recycled in the UK.

#### Recycle

Applied to packaging collected by 75% or more of UK local authorities and then sorted, processed and recycled into new packaging or products.

#### Recycle with bags at large supermarkets | Don't recycle at home

Applied on plastic wrapping such as bread bags, fruit and veg bags, crisp packets and chocolate wrappers. You can recycle this type of packaging at recycling points in selected supermarkets.

#### Don't recycle

Applied to packaging collected by less than 50% of UK local authorities and/or is not able to be sorted, processed and recycled into new packaging or products.

### Recyclability category

International recycling code for materials

**Widely recycled - PET (Polythene Terephthalate)**

**Recyclable - HDPE (High Density Polyethylene)**

**Non recyclable - PVC (Polyvinyl Chloride)**

**Recyclable - LDPE (Low-Density Polyethylene)**

**Recyclable - PP (Polypropylene)**

**Non recyclable - PS (Polystyrene)**

**Non recyclable**

**Recyclable - PAP (Cardboard)**

**Recyclable - PAP (Paperboard)**

**Recyclable - PAP (Paper)**

**Recyclable - FE (Steel)**

**Recyclable - FOR (Wood waste)**

#### Recycled content

# Packaging Automation

Transform your operation with packaging automation and packaging machinery.

Packaging automation systems are ideal for high demand packing environments where speed is key. If you're shipping a range of different shape products in significant volume, the right packaging machinery and processes can help you optimise your operation, cut costs and future-proof your production line for growth...

## Signs your operation could be ready for packaging automation

- Your packaging is increasingly taking up room in your warehouse
- You continually need to hire new staff for your production and/or packing line
- Your packs produced per hour aren't increasing in line with demand
- Your business is creating increasing levels of packaging waste
- You experience an uplift in customer complaints about damaged goods (if demand is too high, packing quality could be less reliable)
- Your team morale in packing areas may be lower due to increased workload

## How packaging automation can benefit your business

- Lower your packaging costs
- Improve pack line productivity
- Reduce your carbon footprint
- Enhance packing quality control
- Use less packaging materials
- Save on storage space
- Optimise transport usage
- Future proof for growth and seasonal demand

**Almost any packaging process can be automated from boxing, void filling, bagging, pallet wrapping and taping through to warehouse movement. There are semi and fully automated solutions available for a range of applications and businesses of different sizes. Contact the Macfarlane team to find out more...**

# Automation products from Macfarlane

Almost any packing process can be automated. At Macfarlane Packaging, we can help with a wide range of packaging automation equipment from boxing machines and case erectors through to water activated tape dispensers and pallet wrappers – and everything in between!

Here's the types of packaging equipment and automation solutions we can supply:

## Box Automation

- Case erectors
- Automated boxing machines
- Right size carton systems

## Bag Automation

- Automatic bagging machines
- Horizontal and vertical auto baggers
- Bulk bagging equipment

## Strapping Automation

- Semi and fully automated strapping machines
- Friction welders
- Strapping and banding tables

## Protective Automation

- Semi and fully automated void fill systems
- Air cushioning and air pillow machines
- Integrated void fill systems

## Paper Automation

- Paper void fill machines and systems
- Paper wrapping equipment
- Paper cushioning systems

## Tape Automation

- Semi and fully automatic case sealers
- In-line tape machines
- Gummed paper tape dispensers

## Polythene Automation

- Shrink wrapping machines and shrink wrappers
- Heat shrink tunnels

## Stretch Automation

- Semi and fully automatic pallet wrappers
- Horizontal stretch wrapping machines
- Vertical stretch wrapping machines
- Rotating arm stretch wrap machines

## Auxiliary Equipment

- Automated labelling
- Case stackers
- Case sorters
- Palletisers
- Conveyor systems

# The Packaging Optimiser protects your profit and the environment

The Packaging Optimiser from Macfarlane Packaging can help you protect margins and the environment by eliminating the hidden costs in your packaging operation.

Find out what your packaging operation is really costing your business and the planet

# Box information

## How to measure a box

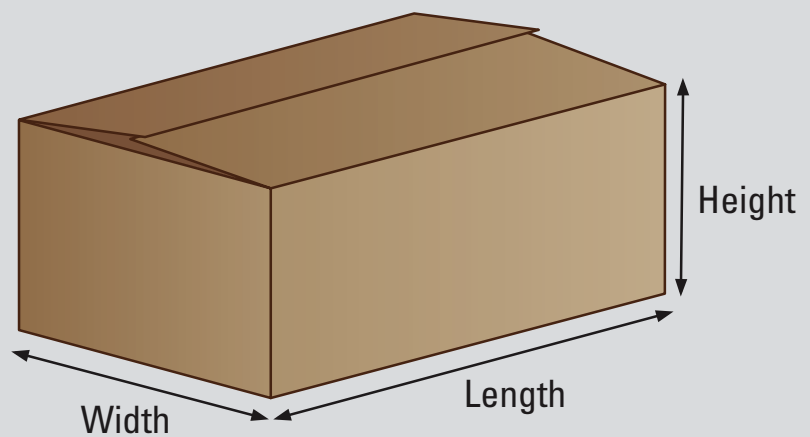

Dimensions are usually expressed as internal dimensions in mm as follows: Length (L) x Width (W) x Height (H).

Macfarlane Packaging has internal design and manufacturing capabilities and works with the leading international packaging manufacturers to provide the best and unbiased packaging solutions, at the most competitive prices.

**Length = The longer dimension at the opening**

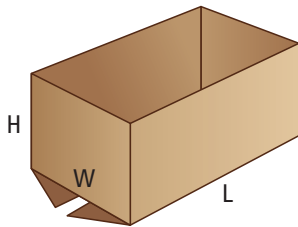

**Width = The shorter dimension at the opening**

**Height = The dimension from the top of the opening to the base**

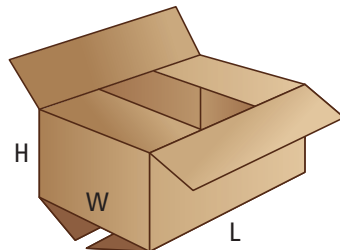

## Popular FEFCO Styles

FEFCO styles are International Fibreboard Case Codes: an internationally recognised methodical presentation of case design styles.

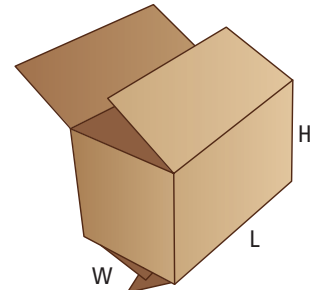

### 0200

An open top box with flaps meeting at the base, which need to be sealed. Often linked with the **0422** lid and used for storage.

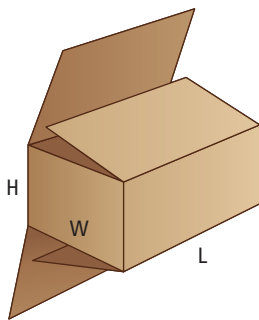

### 0201

The most common corrugated case. Outer flaps meet at the top and bottom and require sealing. It will not require any tooling unless it needs modification for specialist erecting machines. This is the most economical way to pack most products. The side seam is usually glued but can be stitched. Stacks well.

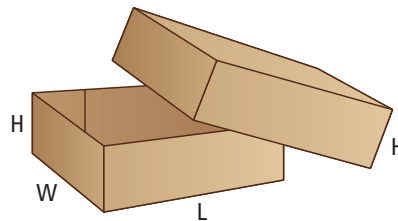

### 0202

Similar to **0201** but with the outer flaps overlapping by a specified amount. Ideal for cases where extra strength and security are needed. Excellent for use with polypropylene strapping as the method of securing.

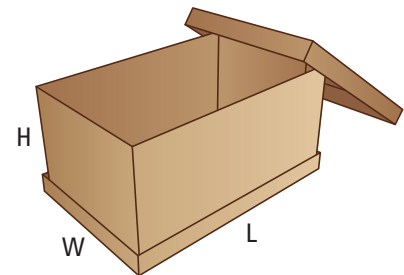

### 0203

Similar to the **0201** but the flaps fully cover the base and top. This gives added strength to the case especially if taped in certain ways.

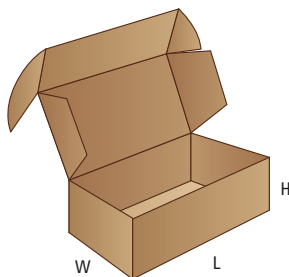

### 0301

Tray and lid. Used for shallow products and an economical way to purchase this format as it can be made without tooling. However, the corners of the lid and tray would need to be sealed. A neater solution would be the **0422**, particularly if the volume required is significant.

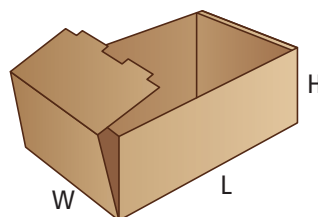

### 0310

A combination pack of **0501** sleeve with **0452** top and bottom caps (not featured). Generally used for pallet packs or with automated packing systems. Requires stitching or gluing of the caps.

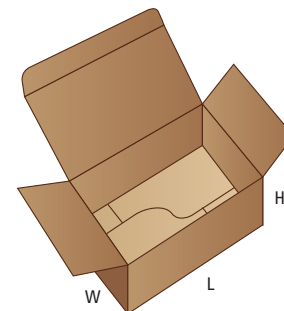

### 0427

Folder-type boxes and trays usually consist of only one piece of board. The bottom of the box is hinged to form two or all side walls and the cover.

### 0422

Lid for **0200** or used as a tray. This will require a tool to make but is then easily erected without sealing.

### 0713

Ready-glued cases consist of basically one piece, are shipped flat and ready to use by simple setting up.

## Single Wall Boxes

Storage for every demand

Custom sizes and printing available

Call Us

Our single wall box range is now FSC® certified and contains 90% recycled content.

Single wall boxes provide durable protection, using outer and inner liners reinforced by specially designed fluting for added strength.

Our corrugated packaging is made from natural, renewable sources.

Single wall boxes are available in a range of sizes to meet every demand. Dimensions – measured internally for optimum fit – are shown in millimetres: as length x width x height.

**Ask us about...** heavy duty corrugate pallets which are exempt from ISPM 15. They hold up to 750kg and can reduce shipment weight by around 20kg.

## BDCM Boxes

A range of standard, printed cartons of superior quality commonly used in garment and catalogue trades.

Specially made for use by the clothing, retail and catalogue trades. This designated range of traditional BDCM boxes is printed in blue with the relevant trade category details, as required by many large clothing retailers. Macfarlane supplies BDCM 1, BDCM 2 and BDCM 3 boxes.

Product Code	Reference	Size (mm) L x W x H	Approx. Load Guide (kg)
005150	BDCM 1	595 x 295 x 388	10
002985	BDCM 2	393 x 293 x 393	10
003193	BDCM 3	595 x 295 x 188	10

## Presswood Pallets

Protection that saves on space – anywhere in the world.

Presswood pallets combine 85% natural wood fibre with a man-made resin. Moulded at high temperature to provide a smooth, solid base which also protects loads from moisture and contamination.

Presswood pallets are compliant with quality standard accreditation on heat-treated products ISPM 15 (International Standards for Phytosanitary Measures).

The nesting design of this pallet saves over 50% of storage space when not in use. The rounded corners, with no nails or screws, are not only safer but also create an ideal surface for shrink or stretch wrapping. The moulded finish provides a solid top deck for ultimate box protection.

Moulded finish  
provides ultimate  
resilience and a  
smoother surface

Nesting design  
saves space

## Custom packaging

At Macfarlane Packaging, we can help you with all kinds of custom packaging. Whether you need a bespoke packaging solution to provide protection for high-value products or want to enhance your customer experience with branded packaging, our experts will be with you every step of the way...

Free Custom Packaging Estimates

Bespoke Packaging Sizes and Printing

Expert Packaging Design

Custom Packaging Quality Assurance

An intelligently designed pack can play a major role in reducing damages, increasing productivity, reducing your packaging waste, and controlling transport costs. Plus, packaging that reflects your brand can help you create a great impression on customers.

**Almost any type of packaging can be customised to your specifications – whether you need a specific size, design, or printing.**

**From boxes, bags and tape through to custom protective materials, chilled packaging and bespoke warehouse design, the Macfarlane team will be able to deliver the solution you need.**

Scan me to find out more

### Here's how custom packaging can benefit you:

- Protect your products more effectively
- Improve your customer experience
- Build brand awareness
- Make your packing operation more sustainable
- Reduce damages and returns
- Lower your shipping costs

# Box automation

Macfarlane Packaging can supply your business with a wide range of auto-boxing solutions to increase productivity and reduce operating costs. There are several options available, depending on the number of items you ship each day and the space in your warehouse.

Below are just a few examples of box automation available on the market.

## Case and Box Erectors

A case erector is a machine used in the packaging industry to automatically assemble cardboard boxes and cases. These machines are commonly used in manufacturing and distribution facilities to streamline the process of packing products and are available in semi-automatic and fully automatic configurations.

- **Semi-automatic case erectors** have been designed to minimise the amount of time and effort that goes into manually erecting a box. They are a great first step into automation and a more economical option for smaller operations or for companies with specific packaging requirements.

An operator typically places flat cardboard box blanks into the machine's loading area. The machine then folds the lower flaps and holds the open case steady, allowing packing to take place with both hands. This helps increase packing speed.

- **Fully automatic case erectors** are machines that can complete the entire case erection process without significant manual effort. They can feed and erect boxes without requiring an operator to load or unload boxes individually. They can handle higher volumes of cases and are generally used in larger-scale operations where efficiency and speed are crucial.

When deciding between semi-automatic and fully automatic case erectors, it is important to consider factors, such as production volume, budget, available floor space, and the level of automation required.

Case erectors can be used alone or in conjunction with a case sealer, as part of a more integrated system.

Boxes

## Right Size Carton Systems

Automated box-sizing machines measure the size of products and adjust the box size to offer the best fit for the content.

This helps ensure only the necessary amount of packing material is used without compromising product protection. The machine also folds the box and seals the lid on, significantly speeding up packing lines and increasing productivity.

## Automatic solutions for smaller products

Ranpak Flap'it!™ is an integrated packaging system ideal for shipping small, flat products, such as books, video games, DVDs, spare-parts, and small electronics.

It can be used for packing single or multiple items and is a great substitute for traditional book wraps when it comes to reducing time, resources, and ensuring uniformity.

The Flap'it!™ solution uses a magazine fed cardboard blank which is then twisted into a cross shape. The final package height is then adjusted after products have been inserted to ensure a good fit. The box flaps are then folded and glued together, using hot-melt glue. This makes the parcel ready for shipping.

We can provide a wide range of case erectors and box automation systems from quality machinery brands. **Get in touch** to find out more.

## Temperature Controlled Packaging

Our range of Temperature Controlled Packaging is suitable for transportation of ambient, chilled and frozen products for cold chain shipping businesses who specialise in perishable and temperature sensitive product.

We also have solutions suitable for bulk supply chain distribution and ecommerce shipments. From pallet covers to postal envelopes, we have temperature controlled packaging for all aspects of your business.

Use of a coolant ensures cold temperatures are maintained in transit. If your products are sensitive to the cold, our products also provide thermal insulation that can ensure that heat is retained within the shipment. Our specialist team can advise you on the best products and processes to ensure that your products arrive in perfect condition to its final destination.

## RecycoolMe

Our RecycoolMe shippers are 100% kerbside recyclable. Made from recycled kraft paper, the packs include an outer box with NiceCube liners that will keep products below -5°C or between 2°C – 8°C for up to 48 hours, when used with a coolant.

Coolant is not included in the pack and should be purchased separately.

Product Code	Size (mm) L x W x H	Unit

## Coolants

We recommend that a coolant is used when shipping products that need to maintain a low temperature in transit. **We offer 5 types:**

## RecyCold® cool pack

These paper pouches have a polyethylene (PE) coating and contain a cooling gel which, at end of life, can be disposed of in a garden, or in a bio-container.

Please note, this product has a 6 month shelf-life before freezing, the production date is printed on the pack.

## Ice Sheets

Strong, safe, clean and pure, available in a range of 3 sizes. Please remove water before recycling.

Product Code	Description	Weight	Qty
322325	4 water pockets	250 grams	P80
322328	8 water pockets	500 grams	P44
322330	16 water pockets	1000 grams	P22

## Gel Packs

Highly purified water that has been through a 6 stage filtration, UV sterilisation, softening and chlorination process. Our gel formula is less susceptible to deformations, allowing them to remain a more uniformed shape when freezing. Please remove water before recycling.

Product Code	Size	Weight	Qty
322334	170 x 170mm	500 grams	P20

## Hydro-Freeze Ice Packs

A dry ice alternative. To maximise the full effectiveness of these ice packs, they will need to be frozen at a temperature at or below -22°C prior to use to activate the phase change. The colder the better when sending frozen goods. Please remove water before recycling.

Product Code	Size	Weight	Qty
322336	200 x 190mm	66 grams	P34

Environmental impact rating See page 5

## Sorbatek

Developed with the seafood industry in mind, these maintain temperatures for up to 48 hours when combined with our CooliMate® shipper range. Please note that these require soaking in water before freezing.

# Bag automation

Auto bagging machines operate on similar principles to auto boxing systems. They automatically place products inside customised bags which are then cut to size to ensure optimum fit. This ensures reduced material wastage and allows multi-sized products to be despatched efficiently with minimum labour efforts and time constraints.

There are two main types of auto bagging machines: horizontal and vertical. They differ in orientation and the way they operate. Vertical machines come in two types: desktop and floor mounted.

Bags

- **Vertical bagging machines** – These machines are used to package products vertically. They are commonly used for packing items of various consistencies, such as liquids and various powders, including coffee granules, sugar, and flour. They are typically seen in industries, such as agriculture, food, pharmaceuticals, and cosmetics.

- **Horizontal** – These machines are used to package products horizontally. They are ideal for packing solid, irregularly shaped items, such as snacks, bread, soap, cheese and cookies. They are typically used in the food, pharmaceutical, cosmetics, hardware, textile and other industries where efficient and consistent packaging is essential.

The choice between horizontal and vertical auto bagging machines will depend on your product type, production rate, space, and your packing requirements. There are various models and types of machines available, including semi-automated and fully automated solutions, depending on your budget and requirements.

## Autobag® PS 125™

The Autobag® PS 125™ is a tabletop auto bagging machine that provides enhanced efficiency, speed and unmatched quality.

This small-footprint, lightweight auto bagging machine has many benefits to offer, including:

- **Unmatched Speed:** efficiently produces up to 25 packed and sealed bags per minute, saving you valuable time and resources.
- **Compact Design:** ideal for low- to mid-volume bagging operations.
- **Ease of Use:** simple “plug and play” auto bagger, with an all-electric configuration, so no compressed air line is required.
- **Wide Range of Bag Sizes:** can make bags sized 55 to 260mm wide and 102 to 430mm long – but the system can be configured for longer bags if needed.
- **Versatile Compatibility:** suitable for a wide range of industries, from automotive, electronics, plumbing and heating to jewellery, food, cosmetics, hobby and craft.

The machine is available in two models: the Autobag® PS 125™ and Autobag® PS 125 OneStep™.

## Autobag® PS 125 OneStep™

The PS125 OneStep™ model comes with an integrated PH 412 printer that can print high-resolution graphics, text, and barcodes directly on the bag.

The printer features a tilt-back print head maintenance and can optionally be equipped with an AutoLabel™ design software that streamlines the process of creating labels.

We offer auto bagging machines that can use paper and polyethene bags. Custom print options are available too. **Contact us for more details**

## Mail Lite® White & Gold

Mail Lite® mailing products make up the most complete line of cushioned and non-cushioned mailers in the industry.

Our Mail Lite® mailers now use PE coated paper FSC® certified paper which can easily be recycled in the paper waste stream.

This also means it is now easy to separate the bubble from the outer paper without compromising the cushioning performance. The internal bubble is made with at least 30% recycled content.

## Mail Tuff®

### Durable Mailers

Resilient inner adds security in the post

**Very Resistant:**

Manufactured from polyethylene film, Mail Tuff® envelopes are highly resistant to tearing and punching

**Product Security:**

Mail Tuff® ensures your product arrives safely

- Strong side-welded seams allow for over-stuffing without risk of bursting
- Strong permanent adhesive ensures goods remain safely sealed inside
- Closure system is tamper evident to unauthorised opening
- Opaque Mail Tuff® ensures confidentiality and security
- Ideal way to dispatch non-fragile items, confidential or sensitive reports

**Waterproof:**

The polyethylene construction makes sure the contents are protected from water and the elements

## Paper Mailing Bags

These environmentally-friendly paper bags are recyclable and have a self-sealing strip that helps ensure products are securely locked inside the bag during transport. As no extra adhesive is required, the packages look neat and the in-built tear strip makes them easy to open – all this contributes to creating a positive customer experience. The bags are available in different sizes to suit different products and packaging needs.

## Korrvu® Insert

Reduces the need for additional void filling or wrapping.

Korrvu® is a dynamic packaging product that uses a strong, highly-resilient low-slip film to surround your products, protecting them from shock and vibration by ensuring your product holds centre place inside the box.

Beautiful presentation and high protection.

Great for beauty products and electronic items.

Product Code	Size (mm) L x W x H
271743	182 x 96 x 58
271745	232 x 126 x 78
271751	300 x 180 x 110

More Korrvu® products available on page 57

Insert (including the film) can be recycled as film is less than 5% in weight of the insert

# Protection

Speak to us about paper bubble

## AirCap® Bubble Wrap

The difference is in the barrier!

AirCap® – A better value bubble

**Reduced Costs:** less material is required compared to non-barrier brands.

**Longer Lasting Protection:** our full air bubble maintains consistent cushioning during storage and transit.

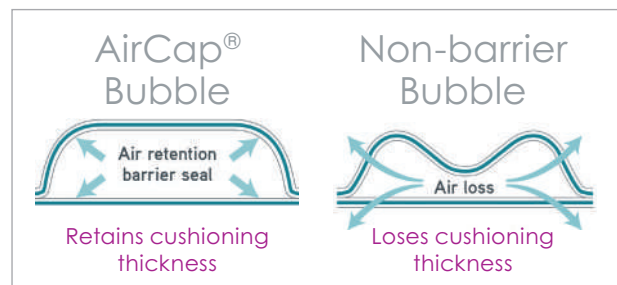

**Quality Assurance:** AirCap® is manufactured under ISO 9001:2008 guaranteeing high standards of production and quality control.

**Ideal for:** cushioning, surface protection, void filling, interleaving, blocking and bracing.

**Small bubble** is best suited for surface protection, defending your items against scratches and abrasions.

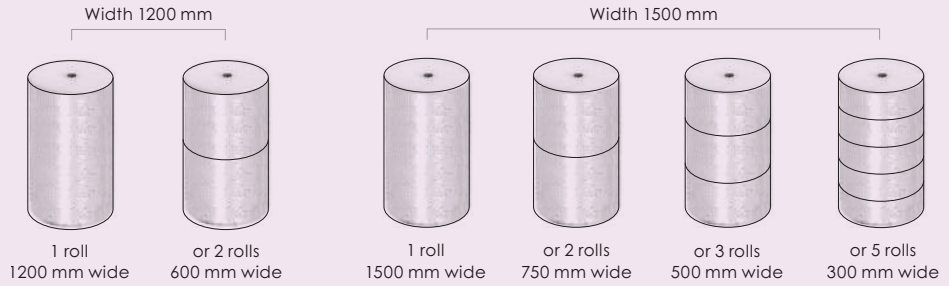

**Large bubble** is best suited for cushioning your products whilst in transit and storage.

**Extra large bubble** is best suited for void fill and large cushioning applications.

# Bubble Wrap

Available in the following combinations:

## Standard Small\*

Product Code	Roll Width (mm)	Length (m)	Bubble Height (mm)	Bubble Diameter (mm)	Pack Qty

## NewAir I.B.® Flex™

### Increase throughput, small footprint

The NewAir I.B.® Flex™ inflatable cushioning system produces NewAir I.B.® and Bubble Wrap® IB materials at speeds up to 90 linear feet per minute. Faster inflation of packing material makes lines more productive, employees more efficient and gets more products out the door on time. The NewAir I.B.® Flex™ System has a compact footprint (less than 6 sq. ft) that works well in cellular packaging environments.

### Maximum inflation reduces excess material up to 50%

Patented technology maximizes the inflation in every cell to reduce the amount of material needed to provide superior damage protection.

### Unmatched reliability

Delays in production can slow down productivity. With the NewAir I.B.® Flex™, limit the potential for throughput loss.

Components are manufactured with high performance materials and coatings for long life system reliability.

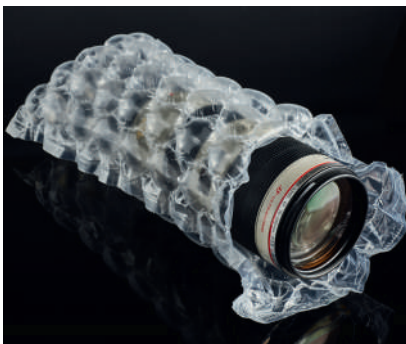

### System accessories for every configuration

The NewAir I.B.® Flex™ is supported by a large array of system accessories, making it flexible enough to be used in all packaging operations. NewAir I.B.® Flex™ is fast enough to keep up with the most demanding packaging operations.

**SealedAir** Product Care **Korrvu® Select**

Reduces the need for additional void filling or wrapping  
 A fast, effective, high performance solution

Korrvu® Select packaging provides proven product protection and maximum versatility in a comprehensive range of sizes and easy to use designs that offers a fast, effective, high performance solution that meets the packaging demands of a variety of products and packaging applications.

Korrvu® Select packaging offers the potential for source reduction and eliminates the need for additional void filling or wrapping. It is a dynamic packaging product that uses a strong, highly-resilient low-slip film to surround your products, protecting them from shock and vibration by ensuring your product holds centre place inside the box.

**Korrvu® Retention Frame**

Cost-effective blocking and bracing protection

Providing shock protection during the shipping cycle, Korrvu® Retention packaging provides cost-effective blocking and bracing protection whilst holding your product securely within its retention frame.

## MINI PAK'R® MACHINE AND RENEW FILM

### Air Cushion Machine

Are you looking to protect your goods during transportation? MINI PAK'R® is a small, easy to use system that allows you to produce air cushions on demand. You can choose different types of air cushions, for any kind of protection you need.

#### Easy to use

Plug in the machine, load the film and it is ready to go. The machine uses an internal air source, no compressed air is needed.

#### Latest technology

Uses RFID (Radio Frequency Identification) technology to automatically select the correct settings for ease of use.

#### Versatile

At a speed of 7.5 metres/minute the machine makes different types of air cushions that fit a variety of packaging applications.

#### Space saving

Machine is compact (LxWxH=36x33x28cm), weighs only 6 kg, and fits almost anywhere.

#### Smart accessories

The MINI PAK'R® can be combined with a range of accessories to make the packaging process even more efficient. Some of the accessories are the Top Fill and the Mobile Fill which allow cushions to be produced on demand.

# PRO PAK'R®

## Air Cushion Machine

### Reliability and efficiency

- One machine can run the complete range of films
- User lockout capability: adjust only specified settings
- Fast machine: produces up to 21 meters of cushions per minute
- Designed for industrial use: 24/7

### High technology

- Radio Frequency Identification (RFID) allows the machine to recognize the film type and adjust its settings accordingly
- History storage (consumption and operator usage tracking)
- Auto-Index Feature- for automatic replenishment of air cushions directly to the packer

### Innovative accessories

The PRO PAK'R® can be integrated to enhance your packing process as well as being compatible with a number of accessories.

### Easy maintenance

No Teflon belts reduces downtime and the 2/48 policy from Pregis will assist in case of problem: we will call you back within 2 hours and solve the problem within 48 hours. One machine can serve multiple pack stations.

## Cell-Aire®

### Polyethylene Foam

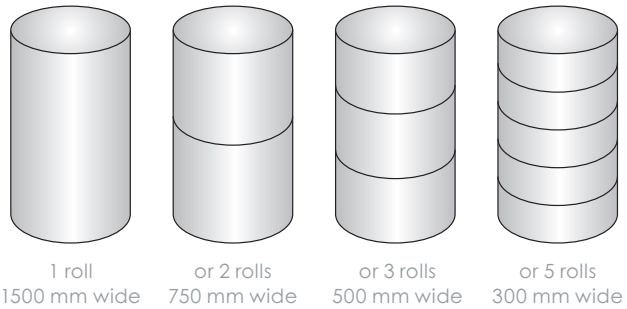

Cell-Aire® polyethylene foam provides superior protection, allowing for fewer wraps or for the use of thinner material.

Cell-Aire® is made of low-density polyethylene,

An alternative product to corrugate roll:

- Versatile and cost-effective
- Clean, non-abrasive and lightweight
- Resistant to moisture damage
- Excellent thermal insulation
- Dust free
- Not recyclable
- Wide range of thickness's available – from 0.7mm to 4mm
- Ideal for surface protection

## SpeedyPacker Insight®

The SpeedyPacker Insight® system delivers cost effective, superior product protection and presents your product to your customers in an attractive, damage-free package.

**Fast:** deliver up to 21 foam-filled bags per minute, providing maximum productivity and product protection at the touch of a button

**Moulded and engineered cushions:** create moulded cushions for products that require a consistent, precise fit and superior product protection

**High volume applications**

**Versatile and efficient:** dedicate a system to one packaging line or multiple packing lines

**New touch screen:** user friendly

Protective

## Instapak iMold®

The Proven Performance of Instapak® Cushioning in a Revolutionary Automated System.

The fully automated Instapak iMold® system creates engineered, pre-moulded Instapak® foam cushions for immediate use or to be transferred into storage bins for batching applications.

**Consistent protection:** guarantees cushion consistency and integrity by dispensing Instapak® foam where it's needed most, while eliminating material waste

**Affordable automation**

**Reduce labour cost**

**User friendly design** and touch screen interface is easy to use

## Instapak FoamWrap™ Express

The Instapak FoamWrap™ Express foam packaging system from Sealed Air® creates Instapak FoamWrap™ material for a variety of packaging applications. The system uses a range of Instapak® high performance packaging foams that provide superior protection with minimal foam usage. A compact design, customizable programming and just-in-time accumulation capability makes the Instapak FoamWrap™ Express system a perfect fit for any size packaging operation.

Environmental impact rating See page 5

## Instapak® Simple™

The Instapak® Simple™ system is true to its name and is the easiest to use foam-in-bag platform yet. The system merges the premium performance of Instapak® foam packaging with an on-demand delivery system that requires minimal operator training and service.

The Instapak® Simple™ system is small and can be easily transferred to remote packaging locations, making it ideal for operations producing less than 20 packs per day.

**Versatility** – suitable for packing a vast range of products

**Just-in-time** – foam is expanded on site ensuring the right amount of material is used every time

**Product protection** – superior cushioning abilities that provide maximum protection with the minimum amount of material

**Space saving** – saving valuable warehouse space

Environmental impact rating See page 5

# Instapacker® Tabletop™

The Instapacker® Tabletop™ system provides affordable foam packaging that combines proven reliability with the convenience and cost-effectiveness of the foam-in-bag process. The easy-to-use Instapacker® Tabletop system has an incredibly small footprint but can make a big impact on your shipping operations. Capable of producing up to 16 Instapak® foam-filled bags per minute, this versatile system can support the packaging needs of medium to high volume shipping operations, multiple pack station operations and even the production floor.

**Maximum value** – This inexpensive, foam-in-bag system reduces material and labour costs.

**Easy to use** – A simple touch key control panel virtually eliminates the operator’s learning curve.

**Compact** – Small, innovative design saves valuable workspace.

**Flexible** – The Instapacker™ Tabletop system supports the packaging needs of shipping rooms, multiple pack station operations and even the production floor.

**Protective** – Instapak® high-performance packaging foam is designed to protect your products during shipping, warehousing and general handling.

**Environmental impact rating** See page 5

# Instapak® Quick RT®

Instapak® Quick RT® foam packaging, provides users with a custom-fit protective cushion that is fast, easy-to-use and ideal for small-to-medium volume packaging:

Convenient, portable, protective foam cushions... anywhere instantly

**Easy-to-Use:**

Anyone can become a packaging expert – instantly.

**Superior Product Protection:**

Virtually eliminate shipping damage..

**No system costs:**

No installation or service required

**Space saving packaging:**

Expand up to 27 times its original volume

**Versatile:**

Protects products of almost any size, shape and weight.

**Fast:**

Expands in seconds to form custom-fit protective foam cushions.

**Convenient:**

Takes up little space and is completely mobile so you can use it anywhere.

**Customer Satisfaction:**

Product arrives in a neat professional package

**Applications:**

Including Internet-based businesses, galleries, independent business owners, pack-and-ship stores, warranty repair depots, moving and storage facilities, retail shipping departments and mailrooms.

## Ranpak® FillPak® M

### Manual, easy to use void fill system

Compact and lightweight, the FillPak® M is the ideal choice for non-industrial environments.

Designed for manual use, this handy machine involves no knife or cutting mechanism. Instead a simple controlled tear is generated at the fanfold perforation. Manual users simply pull the required length of packaging and tear off.

Weight 4kg.

Product Code:  
004705

## Ranpak® FillPak® TT®

### Fast and flexible for individual pack stations

Dispensing up to 1.4m of paper per second, the FillPak TT® accomplishes tasks comparable with bigger, weightier machines.

Light and compact this handy machine can be powered by battery where no electricity supply is available.

The FillPak TT® involves no cutting. A simple controlled tear is generated at the fanfold perforation. Height adjustable and also available with table clamp or floor stand.

Weight 7.5kg.

Protective

## Ranpak® FillPak® TTC with cutter

### Compact choice for effortless void filling on-demand

The FillPak® TTC (Cutter) has all the benefits of the standard TT but with an automatic cut mechanism which makes it very appropriate for packing environments where there is a focus on ergonomics.

- User friendly – increased comfort for packer
- High output – 1.4m/sec converting speed
- EDS functionality – pre-set paper lengths
- Foot pedal option available

## Ranpak® FillPak®

The fastest end of line solution for filling boxes in high volume packing operations

FillPak® runs at high speed (1.4 m/sec) using paper with a width of 76cm. This solution reduces the time needed for filling boxes offering maximum box throughput and an efficient packing process.

**On demand:** paper dispensed at point of operation

**High speed:** converts at 1.4m/sec

**Simple to operate:** allows operator to focus on filling process

**Minimal downtime:** up to 5 paper packs can be glued together for continuous operation

## Ranpak® FillPak Trident™

The in-line FillPak Trident™ machine features a patented triangular FSC paper shape and can serve the dual purpose of void fill and blocking & bracing for safe product delivery in shipping.

When compared to packing with plastic airbags, FillPak Trident™ offers an overall labour saving of approximately 20%.

## Ranpak® FillPak Trident Mini™

The FillPak Trident Mini™ is a 100% FSC paper-based protective packaging solution that potentially delivers an average 20-25% reduction in paper usage compared to other paper-based machines and can eliminate the use of non-sustainable plastic-based products

Due to its triangular shaped paper pads, the FillPak Trident Mini is a flexible and easy to use packaging solution that can serve in void fill applications while providing additional blocking, bracing, and fixation for safe product delivery in shipping.

# Ranpak® FillPak® Fanfold Paper

For use with FillPak® M, FillPak®

TT and FillPak® TT with Cutter

An effective, economic and environmentally friendly void fill solution. Perforated every 186mm.

## Ranpak® PadPak® LC

The PadPak® LC is one of the fastest paper cushioning solutions on the market. It forms 1-ply paper into pads, which protect products during shipping. Individual fan-folded packs of paper, complete with tape strip, mean that the converter is easy to load and runs at high speed. The paper pads provide cushioning, fixating and wrapping.

## Ranpak® PadPak® Guardian®

PadPak Guardian® simplifies everything, combining multiple benefits in one converter. A compact footprint, with reduced size and weight, means that PadPak Guardian® uses your warehouse space more efficiently. It fits into cramped lines where space is tight, and produces both 1-ply and 2-ply paper pads. Converters can be moved easily by operators when required, and quickly adjusted to the height required for individual applications.

## Ranpak® PadPak® Guardian® Paper

## Ranpak® PadPak® CC

### Compact Cushioning

The PadPak® CC dispenses cushioning pads only 11cm wide, allowing them to snugly fit around smaller contents. This means a smaller box can be used and, as a result, less packing material is required.

The compact pads are easy to handle and can be used for a wide range of applications. They are produced on-demand with no bin filling required.

## Ranpak® PadPak JR®

High quality paper cushioning for users requiring flexibility

Protective paper cushioning on demand, ideal for lower volume packing in distribution centres, mailrooms, retail outlets and for home office use.

The PadPak® Junior is compact, portable and easy to use, producing 0.3m of paper per second, through an electric feed with manual cutting. Table top and pedestal options also available. Weight 40kg.

## Ranpak® PadPak® SR

The most versatile cushioning solution to protect heavy or fragile products

Ideal for high volume and labour-intensive packaging operations, the PadPak® Senior is supplied as either a stand-alone unit, integrated into a packing station operation, or built into a production line.

This flexible, height-adjustable micro-processor-controlled unit can convert 2 or 3-ply paper into cushioning pads on-demand, or pre-produced into a bin, at 0.42m per second.

With a range of user modes and automatic cutting, the Senior can also be pre-programmed to produce pads of differing lengths for packing complex products. The handy remote control clearly outlines all machine functions.

Optionally combined with Coiler and/or gluing plate. Weight 180kg.

Protective

## Ranpak® WrapPak®

The innovative waved paper pads have been designed to offer one solution for multiple packaging applications, including box lining, wrapping, thermal insulation and block and bracing.

This helps minimise the amount of different packing materials needed to pack products, improving sustainability and simplifying packaging processes.

The FSC pads are renewable and 100% recyclable and offer an enhanced product protection in transit due to their great shock absorption properties.

Product Code	Type	GSM	Ply	Colour	Width (mm)	Length (m)	Pack Qty	Pallet Qty	Weight (kg)
304369	Fanfold	60	2	Brown	380	450	1	48	10
292889	Fanfold	70	2	Brown	380	360	1	48	10

Environmental impact rating See page 5

## Ranpak® WrapPak® Protector

The WrapPak® Protector creates waved paper pads to solve challenges across many different packaging environments and applications. When box lining, its wide paper pads can cover an entire box surface with just one insert. Wrapping, blocking-and-bracing, interleaving, and even thermal insulation are also easily achieved. It means WrapPak® Protector can replace a wide range of existing packaging materials – so you don't have to keep ordering and monitoring stocks of boxes, aluminium-coated plastics, tapes, and inserts. The WrapPak® Protector converter is also highly programmable to match evolving needs, and is small enough to use at a pack table, in-line or as a standalone unit.

## Pelaspan® Bio Loosefill

Pelaspan® Bio is an exceptionally eco-friendly, pourable loose fill padding material.

- 100% compostable
- Manufactured from cornstarch
- Fast packaging guaranteed
- S-Shape for optimal interlocking and secure cushioning
- Light weight and free flowing
- Dust free, anti-static, wear-resistant and odorless
- Cost effective
- Can be used without prior training

## Mesh Sleeving

A stretchy solution for awkward objects

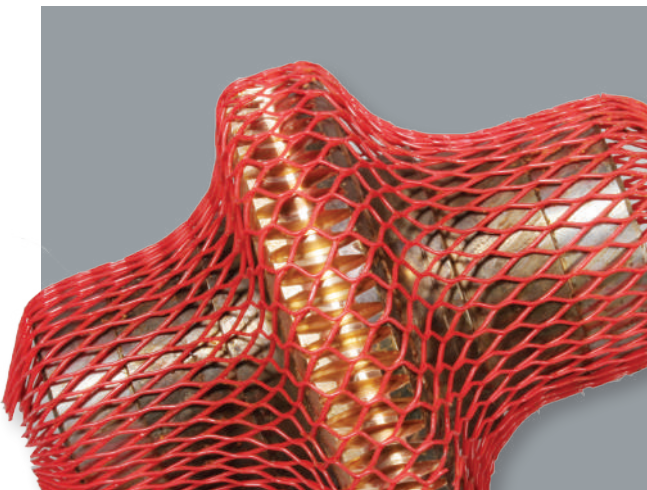

Tubular, plastic stretch netting provides excellent protection against surface damage, scratches, scuffs and indentation in transit.

Particularly suitable for objects where surface protection is vital for example metal, glass, ceramic objects or items with a painted surface. This cost-effective packing solution is used by leading manufacturers and retailers to package and safeguard cylindrical and awkward-shaped items.

Available in a range of colours, weights and stretch capability, the sleeving is easily cut to the required length using scissors.

Plastic mesh netting is clean and dust free.

Mesh sleeving requires minimal storage space.

## Foam Edge Protectors

Designed to absorb impact

Foam edge protection strips are recommended for protecting the corners and edges of furniture, equipment and machinery in transit.

Highly effective in absorbing shock impacts from knocks and bumps, Nomapack® strips are made from polyethylene foam and are available in U, L and O shaped profiles uniquely designed to fit snugly into place.

Supplied in 2m lengths and can be cut to size subject to MOQ.

# Woodwool and Vermiculite

Versatile protectors with strong staying power

## Woodwool

Versatile woodwool can be used either as void fill or made into cushioned pads for the safe protection of bulky or fragile cargo.

Woodwool can be used to pad out boxes of fruit and vegetables, as well as decoratively in food hampers and toiletries. It is also a traditional stuffing for soft toys and taxidermy.

Product Code	Type	Grade	Weight	Pack Qty
000053	Wood Wool GTE 1	Medium	20kg	1

## Vermiculite

Vermiculite provides fireproof, lightweight void fill, which can easily be placed around irregular objects. Its high absorbency makes it an ideal packaging solution for liquid items and is UN approved for use in transporting hazardous materials.

When heated Vermiculite expands up to 30 times its original volume, converting into a granular material. It stands the full shock of impact, retaining full absorbency and protection.

Fibre-free and containing no irritants, Vermiculite does not require protective clothing in handling.

## Corrugated Single Faced Paper

A lightweight but strong and environmentally friendly packaging material, corrugated paper is ideal for wrapping or packing between boxed products.

It can be layered or scrunched, providing excellent protection and cushioning. Our single face papers are made from 90 gsm waste based testliner with a 'C' Flute.

Corrugated rolls are made from recycled fibres and are easily recyclable.

## Kraft Ribbed Paper

### High performance wrapping

Pure kraft paper is a strong, high performance wrapping paper, manufactured from sustainable sources. This makes it ideal for medium and heavy-duty packing tasks where high burst strength is required for lining or wrapping box contents.

Available in a variety of sheet and roll sizes, in 70 or 88 gsm.

## Filla Paper Roll

### An economy choice for void fill packing

This economy paper is ideal for scrunching up as void fill for a wide range of packaging.

It can be recycled with other paper products and offers minimal waste, as you can cut what is required from the roll.

Wall mountable paper dispensers are available for quick & easy use.

## Ribbed Imitation Kraft Paper

A cost-effective choice for general wrapping

Imitation kraft paper has a ribbed finish.

Suitable for light to medium duty wrapping tasks, it provides a cost-effective alternative to pure kraft paper.

### Rolls

Product Code	Size (mm x m)	Paper Weight (gsm)	Approx Weight (kg)	Pack Qty

Call Us

Macfarlane tissue paper comes in a spectrum of shades and finishes.

**Acid-free tissue paper** is suitable for jewellery and silverware, as the items will not tarnish when wrapped.

**Non-toxic tissue paper** is suitable for use with food produce, since there are no toxins to pass on to the food.

**Bleed-resistant tissue paper** is the perfect choice for garment wrapping, as the paper will not run off or stain if it comes into contact with moisture.

**Machine glazed (MG) tissue paper** has a shiny appearance on one side, remaining matt on the reverse to provide contrast in wrapping. Not suitable for use with jewellery, silverware or fabrics unless acid free.

**Machine finished (MF) tissue paper** has a matt finish on both sides.

# Tapes

## Value Tapes – Polypropylene

### The cost-effective option

Our value tapes now contain 30% recycled content, helping to reduce material waste and improve sustainability.

Manufactured using a recycled content 25 micron (standard tape) or 28 micron (Low noise tape) BOPP polypropylene film with a water-based, acrylic adhesive. (Micron specified below in table)

Our low noise polypropylene tapes are a great option to reduce noise in the packing area, as they are quiet coming off the roll.

### Standard Tapes

Product Code	Colour	Size (mm x m)	Tape Microns	Core Size (mm)	Pack Qty
344268	Clear	48 x 66	25	75	36
344273	Buff	48 x 66	25	75	36

### Low Noise Tapes

## Standard Tapes – Polypropylene

High performance with durable adhesion

Macfarlane's strong standard polypropylene tapes are renowned for their high performance, with on-going adhesion.

Manufactured using 25-micron BOPP polypropylene, in buff or clear shiny-finish, standard tapes come either with solvent-based adhesives, for long-term sealing, or hot melt adhesives, recognised for their versatile application, superior tensile strength and ultimate fixing power.

These standard tapes are hard to tear and therefore require a hand dispenser for cutting.

For top performance with a quieter release, choose low noise polypropylene packing tapes.

### Hot Melt

Product Code	Colour	Size (mm x m)	Tape Microns	Core Size (mm)	Pack Qty

## Eco Tape

Our 200m polypropylene eco tape contains 30% recycled content. Made from 25mu recycled content polypropylene film, it has a stronger, more effective adhesive – 20gsm.

With over 3 times as much tape on a roll, it means:

- 3 x FEWER cartons shipped
- 3 x FEWER cartons for storage
- 3 x FEWER rolls changed

Product Code	Colour	Microns	Size (mm x m)	Core Size (mm)	Pack Qty

## PET Tape

Polyester adhesive tape with a minimum 70% recycled plastic material. The reduced thickness allows for increased meterage per roll. Good adhesion at high or low temperatures. Works with standard or recycled boxes.

High mechanical tear resistance.

Product Code	Colour	Type	Size (mm x m)	Tape Microns	Core Size (mm)	Pack Qty
1001057	Buff	Noisy	48 x 100	19	75	36

1001059	Clear	Low Noise	48 x 100	23	75	36

Environmental impact rating See page 5

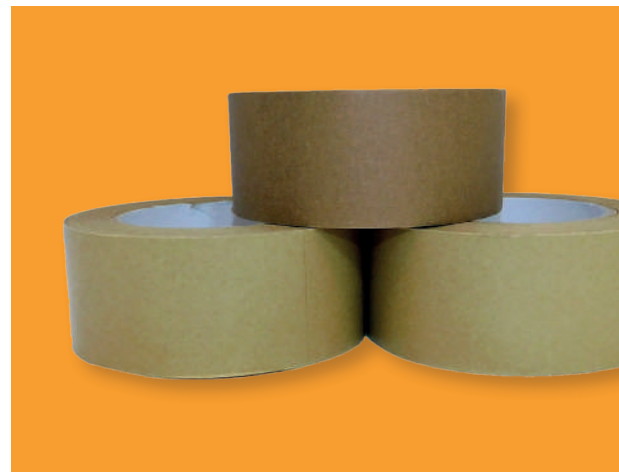

## Paper Tapes

If you are looking for an alternative to plastic tape, we offer a range of recyclable paper tapes. Available in either a self-adhesive or gummed format, these tapes are an environmentally friendly substitute for carton sealing.

## Self Adhesive Paper Tape

Self-adhesive paper tape is a recyclable alternative to plastic based packing tapes. Our range of self-adhesive paper tape is made using FSC sourced paper, and comes in a wide range of widths and lengths to suit a variety of applications. We also offer a reinforced option, for extra durable sealing. Most of the paper tapes in this range use a hot melt adhesive.

You can recycle our self-adhesive paper tapes in paper waste streams, just like cardboard. It's worth noting that these paper tapes do not biodegrade and are not home compostable due to the adhesive used.

\*Product code 340003 is for use with in line tape machines.

Product Code	Backing	Adhesive	Size (mm x m)	Core Size (mm)	Pack Qty

001062	48 x 50	75	24
001053	74 x 50	75	16

Environmental impact rating See page 5

## Gummed Paper Tapes

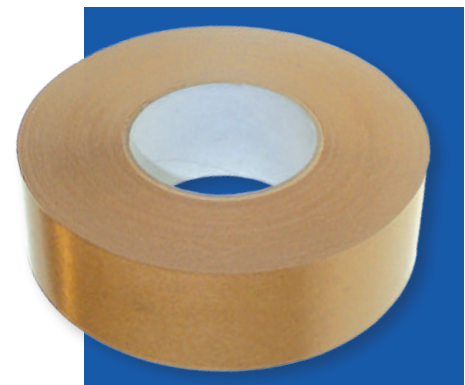

Biodegradable and recyclable gummed paper tapes from Macfarlane provide an environmentally friendly alternative to standard packing tape. These hardwearing tapes are suitable for sealing all parcels and cartons.

Tapes require water to activate the adhesive. A paper tape dispenser is required to moisten, cut and dispense tape automatically. Once removed from the box the tape cannot be resealed and therefore provides visible evidence of any tampering. It is also tolerant of storage temperature fluctuations.

Product Code	Quality	Type	Size (mm x m)	Pack Qty

## Grip Taper

A water activated paper tape dispenser that moves with you...

**Portable & easy to carry** The Grip Taper can be easily moved throughout your warehouse and packing area, it's lightweight too.

**Speed up your packing process** The Grip Taper dispenses lengths of moistened gummed paper tape ready for sealing with speed.

**Rapid to refill** Minimise downtime in your packing operation, it's easy to change rolls when using the Grip Taper gummed paper tape dispenser.

**Seamless integration** You can choose to use the Grip Taper as a handheld device or store it on a packing bench mount for the best of both worlds.

**Control over material use** The easy-to-use controls allow you to set pre-determined lengths of tape, helping you regulate how much packing tape you use and minimising waste.

## Printed Warning Tapes

### A clear message for safe handling

These printed warning tapes provide dual-purpose protection for delicate or high value goods.

The clear message gives easily visible instructions on safe handling during transit and storage, while the tough adhesive tape ensures packages remain secure.

Printed tapes can also show where cartons have been opened or tampered with.

With a choice of seven messages, Macfarlane can also customise your individual warning message. Available in white printed PVC vinyl or low-noise polypropylene.

### Low Noise Polypropylene

## Reinforced Filament Tapes

Extra strength for heavyweight packaging

This extremely strong adhesive tape is reinforced with glass fibre filaments either down the length of the tape (single weave) or across and down the tape (cross weave). A popular solution for bundling bulky items and sealing or reinforcing heavy boxes, reinforced filament tape is also a widespread choice for packing in the steel industry as a replacement for steel and polypropylene strapping.

A packing knife or scissors is required to cut reinforced filament tape, offering tamper-evident qualities, as any cut will be easily noticed.

Product Code	Type	Size (mm x m)	Core Size (mm)	Pack Qty
003045	Single Weave Filament Tape	25 x 50	75	36
003046	Single Weave Filament Tape	50 x 50	75	18

## Tamper Evident Tapes

Plain and simple security for precious parcels

Custom options available  
Call Us

This cost-effective security tape is a plain and simple deterrent, offering clear visibility when a parcel has been tampered with.

One of Macfarlane's best-selling products, it adds a seal of security to high value parcels, display packaging, cash bags and computer software.

If the tape has been removed or tampered with, a 'void opened' message appears on the package surface. Once pulled away the tape cannot be reused or resealed without being noticed.

## Machine Applied Tapes

Designed for use with automatic and semi-automatic tape machines, these specially manufactured packing tapes are suitable for use in the food industry.

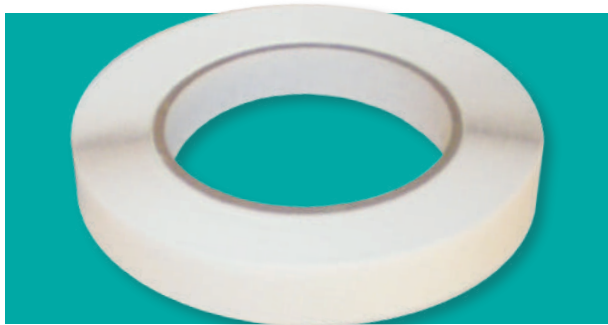

The polypropylene construction and shiny finish provides quick release off the roll.

Product Code	Colour	Size (mm x m)	Tape Microns	Tape Adhesive	Core Size (mm)	Pack Qty
005766	Buff	48 x 990	28	Hot Melt	75	6
009035	Clear	48 x 990	28	Hot Melt	75	6
009039	Clear	48 x 990	28	Solvent	75	6

Ask us about case sealers and automatic taping machines

Environmental impact rating See page 5

## Double Sided Tapes

Double-sided polypropylene tapes create firm tack, due to the hot melt glue used in the manufacture. A knife or scissors are recommended for cutting tape from the roll. Double-sided tissue tapes are coated on both sides with a clear adhesive.

Our range of double-sided fingerlift tapes is manufactured with a hot melt glue recognised for versatile application, superior tensile strength and strong adhesion.

Product Code	Type	Size (mm x m)	Core Size (mm)	Pack Qty
006908	Double Sided Polypropylene Tape	50 x 50	75	24
000835	Double Sided Tissue Tape	25 x 50	75	48
004996	Double Sided Fingerlift Tape	12 mm (backing) and 6 mm (tape) x 50 m	75	96
006909	Double Sided Fingerlift Tape	18mm (backing) and 12mm (tape) x 50 m	75	60

Environmental impact rating See page 5

## Cloth Tapes

Black cloth, or 'gaffa' or 'duct' tapes are a professional, multi-purpose solution for heavy-duty sticking tasks.

The cotton mesh construction and waterproof finish, with super-strong, rubber compound adhesive, provides a lasting bond for a broad range of requirements, including rolled-up carpets and rugs, securing cables, temporary flooring, flooring protection and averting tripping hazards.

Product Code	Tape Material	Size (mm x m)	Core Size (mm)	Pack Qty
219296	Cloth	50 x 50	75	24

Environmental impact rating See page 5

## Floor Marking Tapes

A cost-effective solution for designated areas

Select your colour from this range of six floor marking tapes manufactured for Macfarlane.

The general purpose vinyl adhesive tapes are visibly bright, extremely strong and provide a cost-effective option for factory and warehouse use, where designated areas need marking out for storage, walkways, truck routes, loading bays and any hazard spots.

Very long lasting and much easier and cleaner to apply than paints.

Product Code	Colour	Size (mm x m)	Core Size (mm)	Pack Qty
000325	Black/Yellow Marking Tape	50 x 33	75	24
000310	Green Marking Tape	50 x 33	75	24

## Grip Taper

Grip Taper is a portable, lightweight water activated paper tape dispenser that can be easily moved throughout your warehouse and packing area.

It dispenses lengths of moistened gummed paper tape ready for sealing to keep your packing process running smoothly. Plus, it's easy to change the rolls, so you don't have to worry about running out of tape.

You can use it handheld or store it on a packing bench mount for the best of both worlds. The easy-to-use controls allow you to set pre-determined lengths of tape, helping make sure you're using the right amount of tape and reducing waste.

Product Code:  
1001082

## Case Sealers

A case sealer is a machine used in the packaging and shipping industries to seal cases in a safe and reliable manner. It increases productivity and ensures a consistent and reliable bond between the adhesive and box. Depending on the type, a case sealer uses tape or glue to seal cases.

- **Tape case sealers** dispense pre-set lengths of tape, reducing the amount of packaging waste and speeding up the packing process. It can be integrated into your packing line and, when used in conjunction with a case erector, reduces the number of operator touches to the pack even further.

Consistency of application ensures the tape does not break away from the box, making the whole parcel tougher and more secure. All this makes shipments look neat while ensuring products are well protected during storage and transportation.

- **Glue case sealers use** a hot melt adhesive to provide a strong and reliable seal on cases, ensuring that they stay closed during transportation and storage. They are designed to maintain their strength over time and usually offer a stronger bond with a box than tape solutions, therefore, are great at supporting heavier loads.

Like case erectors, case sealers are available in semi-automatic and fully automatic models. We also differentiate between pre-set and random solutions.

- **Pre-set automatic case sealers** are designed to seal boxes or cases of a specific size and format. This solution is ideal for high-volume production lines with uniform packaging requirements. They tend to be more affordable than random box sealers and are usually simple and efficient to set up.
- **Random automatic case sealers** are capable of sealing boxes or cases of various sizes and formats. They are ideal for operations with a wide range of box sizes and shapes, which makes them more adaptable to changing packaging needs. They are typically more expensive and more complex to set up than pre-set case sealers. This is due to their advanced technology and versatility.

Whether you go with a pre-set or a random option will depend on what your packaging needs are, how much you're willing to spend, and what your production goals are.

If you are unsure with type and model is right for you, contact us today and we will be happy to guide you through different options available.

# Polythene

## Layflat Polythene Tubing

A versatile, budget packing solution

An amazingly simple, yet highly effective, budget packing solution with broad flexibility, in particular for protecting long length items such as piping, tubing and wooden mouldings.

Layflat polythene tubing can be used to make polythene bags to size by using a heat sealer.

## Magneta Heat Sealers

The Sealmaster Magneta has a proven track record delivering failsafe, top quality performance.

In production for 25 years, this robust machine remains one of the world's most popular heat sealers. It can be operated by hand, or with the optional foot pedal and is equipped with a magnetic hold-down device, which ensures consistency, independently of the operator.

User-friendly and safe to handle, these machines are ideal for use with polythene, polypropylene, laminates and some foils. Using the inbuilt cutting device, they also work well with pre-made bags or layflat tubing material.

Product Code	Description	Seal Length (mm)
000347	Magneta 421mg Heat Sealer	420
001050	Magneta 620mm Heat Sealer	620
001026	Magneta 820mm Heat Sealer	820
001064	Magneta 1020mm Heat Sealer	1020

**3 year warranty**

\*Doesn't cover consumables

## Heat Sealer with Cutter

This impulse heat sealer is manufactured for polythene up to 400 mm wide and has a 12-month warranty covering non-consumable parts and labour.

The sealers are ideal for use with lay-flat polythene tubing, producing bags to size for product packaging.

Impulse heat sealers use upper and lower heating elements.

This easy to handle heat sealer is designed to seal polythene bags or lay-flat polythene tubing up to 400 mm wide.

The machine comes with a 12-month warranty covering non-consumable parts and labour.

Product Code	Seal Length (mm)
004540	200
004541	300
004542	400

Polythene

## Impulse Heat Sealer

Professional quality impulse heat sealer for use with layflat tubing or plastic bags. Integral film trimming cutter neatly removes surplus film following seal.

Product Code	Seal Length (mm)
004541	300

## Pallet Top Sheets

A protective shield for stretch-wrapped pallets

Custom sizes available  
Call Us

Pallet top sheets are designed to protect stretch-wrapped pallets from wet weather and dust during transit and in storage. A warehouse essential, these tough-wearing sheets are supplied on a perforated roll for easy separation and handling.

To apply the polythene sheet, simply pull the stretch film to the top of the pallet, lay the sheet over, then add a further layer of stretch film, securing the polythene between the layers.

All pallet top sheets are supplied centre folded. The dimensions displayed show the width of the sheet opened out.

Product Code	Duty	Colour	Size (mm)	Sheets Per Roll
223759	Extra Light	Clear	1800 x 1800	500
003084	Standard	Clear	1800 x 1800	150
002694	Heavy	Black	1800 x 1500	150
003083	Heavy	Clear	1800 x 1800	150

Environmental impact rating See page 5

## Centrefold Polythene Sheets

Tough cover-all against dust and moisture

These general purpose polythene sheets are designed to protect items in storage from dust and moisture.

Sheets are unperforated to provide maximum value and minimum waste, allowing you to cut to the size you need, for which we recommend using a packing knife.

Supplied centre folded for ease of handling, the polythene sheet dimensions described show the width of the sheet opened out.

Product Code	Duty	Width (m)	Length (m)	Pack Qty
000728	Light	2m folded to 1m	150	1 Roll
000729	Light	4m folded to 2m	75	1 Roll
000311	Medium	2m folded to 1m	100	1 Roll
000312	Medium	4m folded to 2m	50	1 Roll

## Polythene LDPE Centrefold Shrinkable Film

Dust, dirt & waterproof protection for transit & storage

LDPE shrink wrap films keep products and pallets dust, dirt and water free during transit and in storage.

Sealing around loads requires a shrink film heat system. A shrink film dispenser is also recommended for fast application and storage of shrink film rolls in use. All LDPE shrink films are supplied on a centre-folded roll for easy use. Dimensions show the width of film opened out.

### Light Duty

Product Code	Roll Width (mm)	Open Width (mm)	Roll Length (m)	Pack Qty

Product Code	Roll Width (mm)	Open Width (mm)	Roll Length (m)	Pack Qty
001963	1000	2000	135	1 Roll
006643	1500	3000	90	1 Roll

## Shrink Wrap Pallet Covers

Clear cover adds protection from the elements

Shrink wrap pallet covers provide protective cover from wet weather, dirt and dust in transit and storage, while the transparent polythene construction enables easy identification of the contents.

To use, simply place the pallet cover over the pallet, which acts as a bag. Use a heat shrink film gun to shrink the cover to a tight fit for the pallet and contents.

Super heavy-duty shrink film pallet covers are supplied on a roll as gusseted sacks and perforated for easy removal from the roll.

#### To calculate the size of gusseted pallet cover needed, measure:

- Length of pallet load plus 75mm
- Width of pallet load plus 100mm
- Height of pallet Load plus 50% of width plus 100mm

Custom sizes available

## VCI Polythene

We can supply a polythene VCI solution. Contact your local Macfarlane representative for more details.

Environmental impact rating See page 5

## Shrink Wrap Films – Polyolefin

Polyolefin shrink film is not as corrosive as PVC shrink film, and has a higher yield and clarity. It is also stronger, more flexible and can withstand lower storage temperatures.

This product aids machine usability by creating less build up of material on machine sealing wires, whilst being compatible with manual, semi and fully automatic machines.

Another benefit – polyolefin shrink film does not give off harmful gases which could be hazardous to the environment.

# Different types of film

## Blown stretch films

Blown stretch films are typically used for heavier irregular loads and applications requiring excellent puncture and tear resistance.

Additives are used to provide excellent cling and superior load stabilisation characteristics.

As a result, blown stretch films can be noisy as reels are unwound.

## Cast stretch films

Cast stretch films provide a smooth surface with excellent optics, gloss, strength and cling without additives.

## Pre-stretched films

Pre-stretching involves stretching the film during manufacture. The process can increase film strength, improve load stability, reduce the volume of stretch wrap film needed and subsequently save on stretch film packaging costs.

We offer a range of pre-stretched stretch films designed to achieve optimal pre-stretching results that can be used with stretch wrap machines and manual application operations.

Key benefits experienced from using pre-stretched films include: Reduced wastage, Faster wrapping, Improved health and safety.

Scan me to find out more

## Reduce your stretch wrap costs in 1 hour

If you want to wrap more pallets with less stretch film and reduce your operating costs, our stretch and pallet wrap review is just for you. We spend just 1 hour on site auditing your pallet wrap and stretch wrapping equipment.

A packaging review helps you to improve load stability and reduce stretch film use. This will save you money and time, as well as reduce your impact on the environment.

# Selecting the best stretch film for your requirements

When selecting stretch films consider the following:

## Performance

Selecting a stretch film that provides the right yield strength and performance for the loads being wrapped is crucial. The yield strength denotes the amount of stress a stretch film can withstand without permanently having plastic deformation. Prior to reaching the yield point, a stretch film will elastically deform but return to its original shape once the stress is removed.

We've categorised our stretch films by duty:

	Hand applied Cast Film (mu)	Hand applied Blown Film (mu)	Hand-Applied Pre-Stretched Film (mu)	Machine Film (mu)
Ultra Light	-	-	-	10
Extra Light	-	-	5.5	12
Super Light	-	-	-	15
Light	12	11	-	17
Medium	14	12	-	20
Heavy	16	15	-	23
Super Heavy	19	18	-	30
Ex Super Heavy	28	27	-	-

## Products

Consider the products being wrapped. Also look at the weight load (typically per pallet), the load profile as described below, and the transit process the load will experience.

## Time, Use and Cost Use

Hand wrapping is best suited for smaller or sporadic stretch film wrapping requirements. Introducing machine wrapping may ultimately save time, resources and packaging materials.

## Overlapping

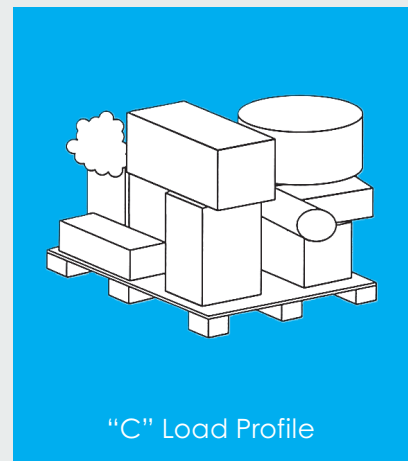

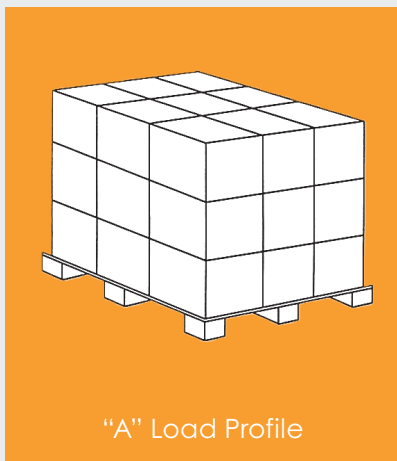

This is a technique for covering the top of your pallet using polythene top sheets (See page 52 for top sheets). This protects your products and provides a downward force on the pallet load. When overlapping hand applied films, it is recommended users allow up to a 50% overlap. If using machine applied films, users should allow a 50 mm overlap, regardless of the film width.

## Banding

This refers to applying multiple wraps of stretch film to a particular area of a pallet to reinforce the load or band multiple units together.

## Neckdown

This happens when a film loses its dispensing roll width and narrows down while being stretched. Neckdown reduces the coverage each wrap provides thereby making it likely that more wrap rotations and more film will be needed to wrap a load or pallet.

# Stretch

## Hand-Applied Stretch Films

Hand-applied stretch films are used for manual stretch wrap packaging application. All hand-applied stretch films are supplied on standard cores for use with hand-applied applicators or extended cores.

- Always place the outside of the film to the pallet surface
- Secure film to the pallet before wrapping by tying to the pallet base
- Always ensure the film covers the base of the pallet and the bottom layer of the load
- Wrap the bottom of the pallet at least twice to secure load
- Overlap film by 30% to 50%
- Depending on the weight of the load, consider wrapping the pallet twice
- To maximise strength use the film horizontally to create a 'strap'

## Hand-Applied Blown Stretch Film

### Clear Films\*

## Machine Applied Stretch Films

Machine applied stretch films are extremely strong and versatile, saving time, resources and packaging materials for high performance applications requiring higher tensile strengths. These films have excellent puncture resistance, good cling, slip and load retention.

Cast stretch wrap films provide a smooth surface with excellent clarity, gloss, strength and cling, without additives. Machine-applied stretch films are suitable for use on power pre-machines up to 300% stretch.

## Power Pre-Cast Stretch Film

# Stretch automation

If you are wrapping 15 pallets or more per day, it may be time to consider stretch automation. We offer a full range of solutions.

## Masterplat Plus PGS Power-Pre Stretch Wrapping Machine

- Entry level Power Pre-Stretch machine
- Suitable for use with light, crushable goods
- Reduce film usage
- Improve pallet stability
- For use with 300% Power Pre-Stretch Film
- 2200mm Wrap Height
- 1650mm Turntable

Available in  
**standard  
and low  
profile**

Larger Turntable Options	Y
Higher Wrap Height Options	Y
Turntable Capacity	2000kg
Automatic Pallet Height Sensor	Y
Indexed Stop Position	Y
Variable Carriage Speed	Y
Variable Rotation Speed	Y
Variable Tension	Y
Power-Pre Stretch	300%
No of Pallets per Day	20 or more
Film Type	Power Pre-Stretch

## Rotoplat 708PDS Stretch Wrapping Machine

- Suitable for use with light, crushable goods
- 1650mm Turntable
- 2200mm Wrap Height
- For use with up to 400% Power Pre-Stretch Film
- Touch screen control panel
- 6 program pre-set

Available in

## Masterwrap HD Plus XL

- Semi-automatic rotating arm stretch wrapping machine
- Perfect for unstable a/o irregular pallets
- Sturdy and reliable with reels up to 20 kg
- Easy to use thanks to the intuitive color interface and the innovative film insertion system
- Wide range, three available carriages: frd, fr and the new pgs
- Possibility of installing r-connect system
- Ideal for logistics

Arm rotation speed (rpm)	7÷11
Carriage up-down speed (m/min)	2,6-6
Maximum product dimensions LxW (mm)	200x1200
Maximum product height (mm)	2000 std. 2400 opt.
Film carriage type	FRD, FR, PGS
Film stretch	manual (FRD), adjustable from panel (FR, PGS)
Film pre-stretch	n.a. (FRD, FR), fixed 250% std. (PGS)
Power supply voltage (V)	230 V 1Ph
Power supply frequency (Hz)	50/60
Max reel dimensions (mm)	500x300
Max reel weight (kg)	20
Film thickness (µm)	7÷35

## Polypropylene Hand Strapping on Cardboard Cores

Macfarlane strapping is ideal for bundling products together or strapping pallets.

Available in medium, heavy or super heavy duty and can be used with a designated stand.

Product Code	Size (mm x m)	Core Size (mm x mm)	Strength	Approx. Breaking Strain (kg)	Pack Qty
1001076	11.7 x 1500	200 x 150	Medium	180	2
331722	12 x 1000	200 x 150	Heavy	215	2
000022	16 x 800	200 x 150	Super Heavy	310	2

Environmental impact rating See page 5

## Strapping Dispenser Trolley

The ideal dispenser for strapping supplied with a cardboard core. Wheel-mounted for mobility in situ.

Product Code	Description	Pack Qty
000018	Suitable for use with 200mm cardboard core strapping	1

## Hand Strapping Starter Kit

All you need to start a secure strapping system.

The hand-applied strapping kit is a cost-effective way to buy strapping products and accessories.

Replacement polypropylene strapping and seals are available to order when you have used up the initial supply.

The kit includes:

- 12 mm tensioner and sealer
- 1 reel of 12 mm x 1500 m
- Polypropylene strapping
- On plastic reel
- 1 dispensing stand
- 500 seals

## Plastic Edge Protectors

These wrap-around plastic edge protectors are designed for use with polypropylene and polyester strapping.

Product Code	Size (mm)	Pack Qty
001311	25 x 25	2,000
001310	40 x 40	1,000

## Buckles

The simple buckle device secures polypropylene or polyester strapping by pulling the strapping through the buckle. Available in metal or plastic, buckles offer an alternative to seals with low tension. A tensioner tool is required.

Product Code	Description	Pack Qty
001307	Plastic Buckles (12 mm)	2,000
001312	Metal Buckles (12 mm)	1,000
001313	Metal Buckles (16 mm)	1,000

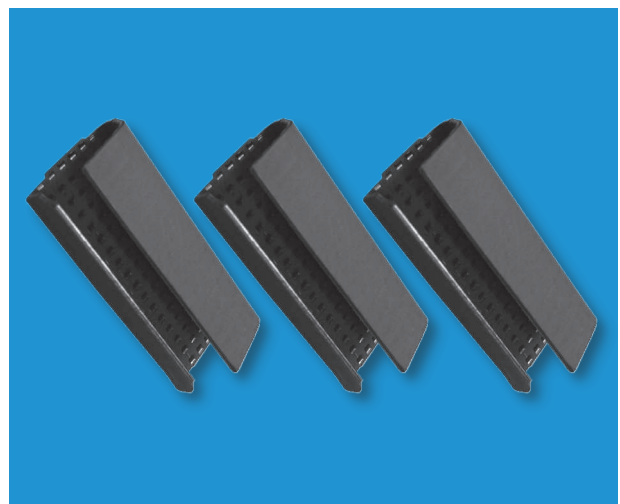

## Seals

A range of semi-open and serrated seals for use with polypropylene and polyester hand strapping.

Semi open strapping seals allow the seal to be placed along the strapping for secure sealing. Seals must be applied with sealer and strapping tensioner or combination tool.

Serrated strapping seals have serrated teeth on the inside of the seal, allowing serrated seals to grip strapping securely and improve the breaking strain.

Product Code	Seal Type	Size (mm)	Suitable Strapping	Suitable Sealing Tool	Pack Qty
002733	Standard Semi-Open	12 x 25	12mm Polypropylene	Economy Combination Tool	2000
002745	Heavy Semi-Open	12 x 32	12mm Polypropylene or Polyester	ST-IMPA Combination Tool	2000
001316	Heavy Semi-Open	16 x 32	16mm Polypropylene or Polyester	ST-IMPA Combination Tool	2000
000017	Serrated	12 x 30	12mm Polypropylene or Polyester	ST-IMPA Combination Tool	1000
001332	Serrated	16 x 30	16mm Polypropylene or Polyester	ST-IMPA Combination Tool	1000

## Standard Tensioner Tool

Gain a tight fit on strapping with this standard tensioner tool that can be used vertically or horizontally.

For use with polypropylene strapping up to 16mm wide. A sealing tool is also required.

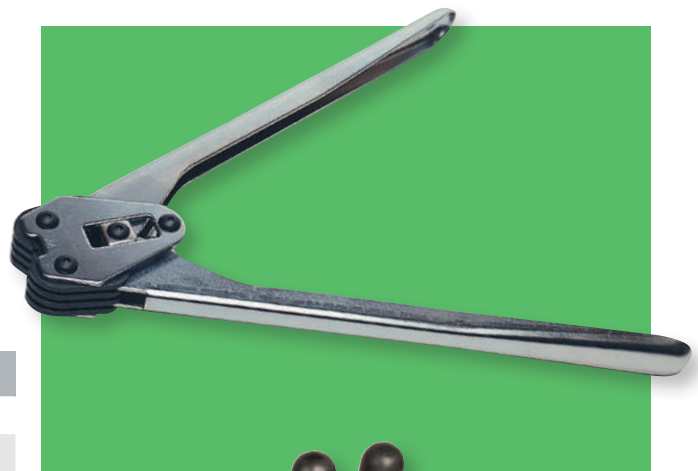

Product Code	Description
001549	Use up to 16mm Strapping

## Standard Sealer Tool 12mm

Long handled sealing jaws allow maximum seal strength to be achieved with minimum physical effort.

Product Code	Description
001552	Use 12 mm Strapping
000669	Use 16 mm Strapping

## Combination Tools

Versatile, all-in-one strapping tools that enable you to tension, seal and cut strapping in one action.

Product Code	Description	Use with
000805	Economy Combination Tool	12mm Strapping
000491	ST-IMPA Combination Tool	Up to 16mm Strapping

## Friction Welder

Battery Strapping Tool with adjustable functioning mode which can be set as Automatic, Semi-automatic, Manual and "Soft". Easy to use and simple to adjust it can be used for both vertical and horizontal strapping. It tensions, cuts and seals at the touch of a button.

Product Code	Description	Model Number

## Polypropylene Machine-Applied Strapping

Machine-applied polypropylene strapping is ideal for bundling products, magazines/newspapers and packages together, or securing individual cardboard boxes.

Light, flexible and easy to handle, it offers excellent performance and reliability for most strapping tasks, with no staining or rusting of the product or package.

Manufactured in white and supplied on a cardboard core, with approximate breaking strains from 100 to 145kg. Available in semi-auto and fully-auto machine formats.

Product Code	Strapping Application	Length (m)	Width (mm)	Strapping Thickness	Approx. Breaking Strain (kg)	Core (mm)	Pack Qty
001017	Semi-Auto Machine	3700	9	0.55	100	200 x 190	2
1001075	Semi-Auto Machine	2500	11.5	0.63	145	200 x 190	2
121740	Fully-Auto Machine	3000	12	0.55	145	200 x 190	2

Environmental impact rating See page 5

## Hand-Applied Polyester Strapping

Polyester strapping is an extremely strong, yet soft, lightweight and weather-resistant alternative to steel strapping.

Polyester strapping takes 2.5 times more energy to break than steel strapping with the same break strain. An 'elastic memory' maintains tension even where there is pack settlement or shrinkage.

There are no sharp edges, creating a safer working environment and also reducing the potential for product damage compared with steel strapping.

Product Code	Description	Length (m)	Width (mm)	Strapping Thickness	Approx. Breaking Strain (kg)	Core (mm)	Pack Qty
001340	Hand-Applied	2500	12	0.06	310	406 x 152	1
007889	Hand-Applied	1500	15.5	0.07	450	406 x 152	1

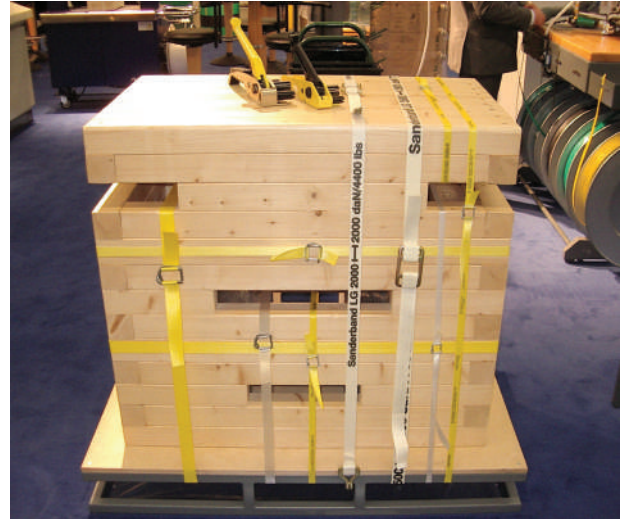

Environmental impact rating See page 5

# Hand-Applied Corded Polyester Strapping

A soft, lightweight, strong and weather-resistant alternative to steel strapping. With textured finish for ultra-firm grip.

Product Code	Width (mm)	Length (m)	Approx. Breaking Strain (kg)	Pack Qty
004745	13	1500	380	1
004746	16	1200	460	1

Environmental impact rating See page 5

# Strapping machines

We can offer a full range of semi and fully automated strapping machines. Below is just a small selection. If you are looking for something different, please contact us.

Product Code	Type	Comments
331697	iQ-400 Semi-Automatic Strapping Machine	Runs PP strap from 5 - 15.5mm
331336	SO-800 Automatic Strapping Machine	Takes strapping thicknesses of 5, 6, 9, 12, 15.5 mm
331698	OB-360 N Automatic Banding Machine	Versatile - 30mm banding, either paper or film tape
331700	JK-5000 Automatic Strapping Machine	Runs strap from 9mm to 12mm width with easy change over
337786	Type D-53PLT2 Semi-Auto Pallet Strapping Machine	For use with standard or heavier PP strapping

## Ribbon Wound Steel Strapping

Steel is traditionally the strongest type of strapping available and remains widely within the construction sector. It has the highest tensile strength of any strapping material.

Product Code	Width (mm)	Length (m)	Approx. Breaking Strain (kg)	Pack Qty
000412	13	330	518	1
000425	16	334	652	1
000432	19	334	775	1

Environmental impact rating See page 5

## Ribbon Wound Dispenser Trolley

Robust wheeled trolley designed for use with ribbon wound steel strapping from 13mm to 19mm wide.

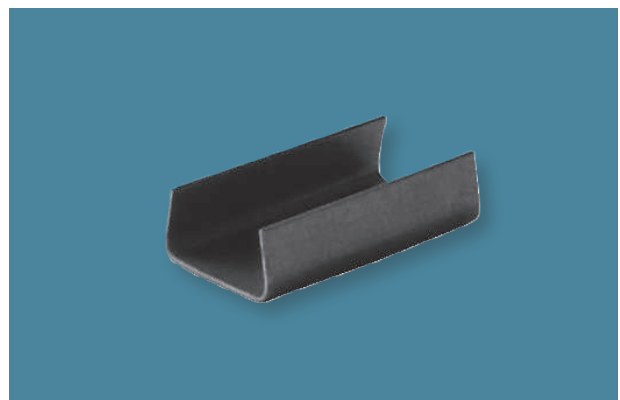

Product Code	Description
001238	Ribbon Wound Dispenser Trolley

## Snap On Seals

Snap on strapping seals are designed for use with steel strapping and provide a semi open seal, which snaps on to hold the strapping securely in place.

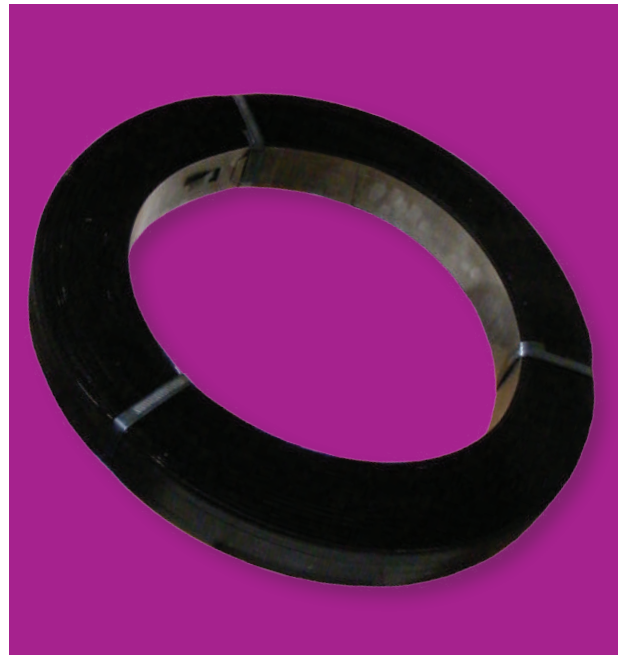

Product Code	Width (mm)	Pack Qty
001224	13	2000
001226	16	1000
001227	19	1000

## Oscillated Steel Strapping

Steel strapping wound in a tight, uniform pattern for added strength.

Product Code	Width (mm)	Length (m)	Approx. Breaking Strain (kg)	Pack Qty
004824	13	965	518	1
005196	16	763	652	1
003141	19	533	930	1

Environmental impact rating See page 5

## Oscillated Steel Strapping Dispenser Trolley

Wheel-along trolley accommodates steel strapping reels from 13mm to 19mm wide, for easy packing in situ.

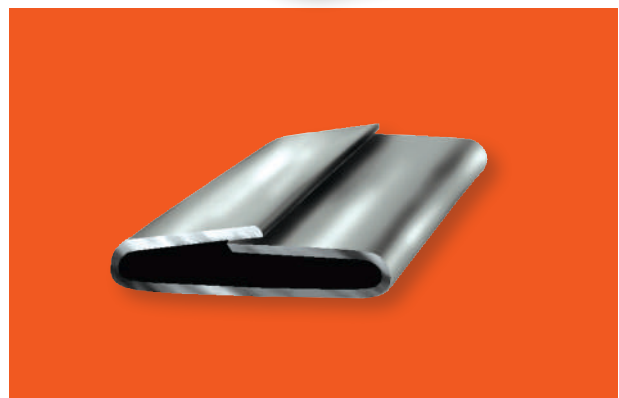

Product Code	Description
002707	Oscillated Steel Dispenser Trolley

## Overlap Seals

Closed seals for use with up to 19 mm steel strapping.

Product Code	Width (mm)	Pack Qty
001416	13	1000
001417	16	2500

## Steel Strapping Sealer Tool

Easy-grip, essential tool specially designed for use with steel strapping.

Product Code	Description	Pack Qty
001233	For use with Steel Strapping up to 13 mm	1
001234	For use with Steel Strapping up to 16 mm	1
001235	For use with Steel Strapping up to 19 mm	1

## Steel Strapping Safety Cutter

Strong, high-performance safety cutters designed for use with steel strapping.

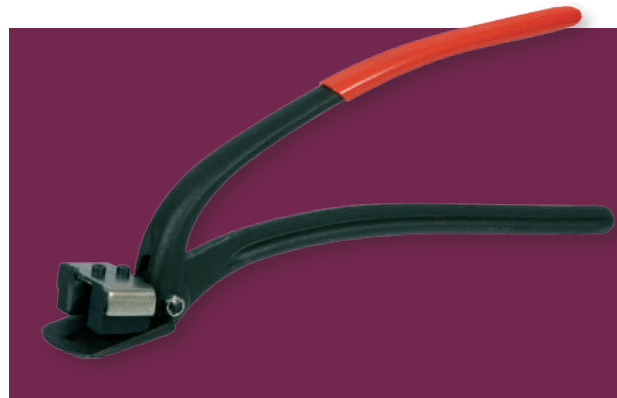

Product Code	Description
001237	For use with Steel Strapping

## Steel Strapping Tensioner Tool

A handy tool that creates the right, tight fit for steel strapping.

Product Code	Description
001236	For use with Steel Strapping

## ST-IMAG Combination Tool

This high quality combination tensioning and sealing device is designed for use with 13mm, 16mm and 19mm steel strapping, to a maximum gauge of 0.6mm.

Product Code	Description
004404	For use with 12mm Steel Strapping
000663	For use with 16mm Steel Strapping
000668	For use with 19mm Steel Strapping

## Industrial Shelving

Solid storage designed for heavy loads

High quality, strongly constructed industrial shelving provides generous storage, designed to support heavy loads.

We offer a range of bolt free, easy to assemble shelving systems, with up to 5 shelves. Shelves slot easily into place with wide gaps between each tier to accommodate bulky boxes, tools and equipment. Ideal for warehouse, packing room and all industrial environments.

Load capacity varies from 175kg – 300kg; please refer to the product table below.

When assembling the shelving a rubber mallet is the best tool to be used.

Product Code	Size mm (H x L x W)	Max Load (kg)	Shelves	Pack Qty
001281	1760 x 900 x 300	175	5	1

001299	1980 x 1525 x 610	640	4	1

## Shelving Bay Connectors

Firm support for your shelving system

Used to secure and hold multiple shelving units in place.

In packs of six, to support 150kg load to 300kg load. Galvanised to prevent rusting.

Product Code	Description	Pack Qty
001249	Joining Pins for 175kg/265kg Shelving	4
2000374	Tie Plates for 420kg/640kg Shelving	4

## Chrome Shelving

Polished stacking, ideal for display

This multi-purpose, bolt-free wire shelving with an attractive chrome finish will slot into most working environments and is ideal both for display and storage.

The four open tiers provide free airflow, preventing moisture build up.

Product Code	Size mm (H x L x W)	Max Load (kg)	Shelves	Pack Qty
007236	1625 x 1830 x 610	150	4	1
001130	1600 x 1220 x 355	175	4	1

001231	1600 x 915 x 455	200	4	1
001330	1600 x 915 x 610	200	4	1

## Shelf Labels and Card Inserts

Spot-on identity check

Macfarlane shelf-edge labels allow quick and easy identification of locations on shelving and pallet racking.

In a choice of self-adhesive or magnetic backings the labels come with a handy, pull-away front for easy loading and amending information.

Self-adhesive labels provide permanent fixing. Magnetic backed labels offer flexibility of location and are also effective in cold storage areas.

Barcodes can be easily scanned through the clear plastic front without removal.

Product Code	Type	Size (mm)	Pack Qty
001396	Self Adhesive	38 x 100	100
001397	Magnetic	38 x 100	100

PFM-3

## Anti-fatigue Mats

Black PVC anti-fatigue mat with raised diamond tread pattern surface for improved grip and high-visibility yellow edge.

Suitable for floors in work room and work areas with an increased risk of slipping due to oil or water-based contamination.

Product Code	Reference Number	Dimensions (mm)	Thickness (mm)
261816	PFM-1	900 X 1500	9
258420	PFM-2	900 x 1500	12.5
301838	PFM-3	900 x 1500	14

## Packing Stations

We offer a range of packing stations which can be adapted to suit the needs of your business.

Please contact us to find the best solution for your needs.

## Shockwatch

These self-adhesive labels are applied directly to the package and, after activation, will turn from clear to red, indicating any mishandling of the product. Available in a range of five coloured sensitivity levels.

Product Code	Description	Pack Qty
003237	Companion Labels for Shockwatch	100 units

### Shockwatch Indicators

Product Code	Colour	G Sensitivity	Pack Qty
003236	Yellow	25	50
003234	Purple	37.5	50
003235	Red	50	50
000255	Orange	75	50
004874	Green	100	50

## Do Not Stack Cones

Do Not Stack Cones are an effective way to prevent shipping and storage damage by easily identifying and stopping the pallet of goods being stacked. Simply secure the cone with strapping or tape.

Product Code	Description	Pack Qty
216142	Do Not Stack Cones	25

## Floor Markers

- Permanent Adhesive
- High visibility floor graphics to highlight warnings and operational hazards
- Graphics printed on the underside of a clear PVC film
- Signs withstand everyday warehouse traffic
- 450mm diameter

Product Code	Description	Pack Qty
283337	Floor Marker 430mm dia. Forklift Truck Area	1
283338	Floor Marker 430mm dia. Pedestrian Traffic	1
283339	Floor Marker 430mm dia. Fire Exit	1

## Rack Sacks

- Simple fixing and trouble-free handling, supplied with two strong "S" hooks
- Suitable for shelving 900mm to 1100mm deep
- Made from tough waterproof polyester with carrying and emptying handles
- Special prints including company names and logos can be printed. Call for information

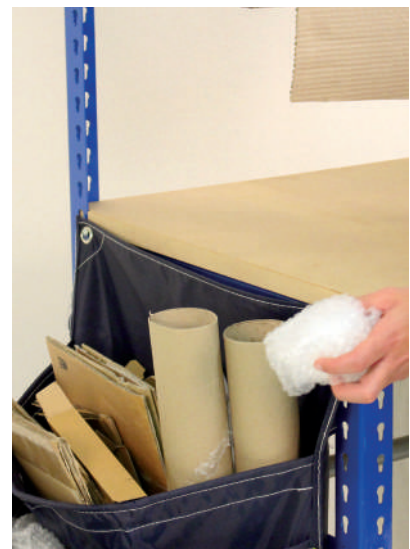

Product Code	Description	Pack Qty
297511	Blue Racksack, each - General Waste	1
300684	Blue Racksack, each - Mixed Paper and Card	1

## Packing Station Sack

- Easily organises waste packaging materials
- Fits by hooking over the sides or can also be secured via eyelets in the top corner
- Manufactured from tough woven polyester
- Suits trolleys up to 580mm wide
- Single pocket – 600 x 600 with a capacity of 50L
- Double pocket – 600 x 600 with a capacity of 55L

Product Code	Description	Pack Qty
283342	Single Pocket Trolley Sack, Single Unit	1
283345	Double Pocket Trolley Sack, Single Unit	1
283343	Self-Adhesive Fixing Hooks	2
283344	Self-Adhesive Fixing Hooks	10

## Packing Opener

A safety-first cutter with highly visible red handle, ideal for cutting stretch and shrink film, polypropylene strapping, bubble wrap and tape. Includes a special blade cover to shield against injury.

Product Code	Pack Qty
001252	10

## Polythene Cutter

Ideal for cutting polythene.

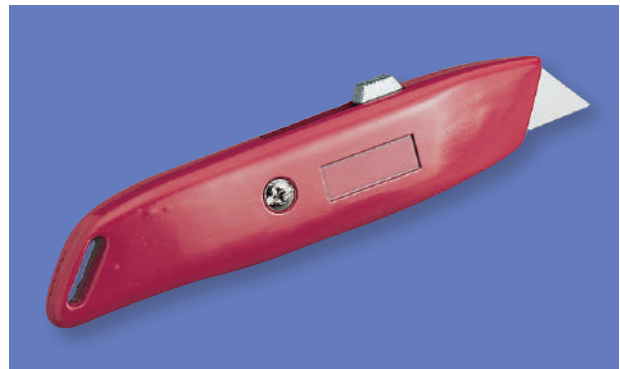

Product Code	Pack Qty
004771	12

## Retractable Packing Knife

This metal retractable packing knife features a high quality, red, die-cast handle to stand out from surrounding boxes. Supplied with three heavy-duty standard blades.

Product Code	Pack Qty
005399	10

## Retractable Snap-Off Packing Knife

A simple, effective cutting tool, ideal for stripping off packaging. Made from impact-resistant plastic. Features a pocket clip and blade snap-off device. A sliding ratchet adjusts the segmented blades.

Product Code	Pack Qty
005437	10

## Box Corner Safety Cutter

Ideal for cutting multi-depth boxes to required height.

Product Code	Description	Pack Qty
214468	Box Corner Safety Cutter	1
219116	Replacement Blades	100

## Glue Guns & Adhesives

Gain speedy and accurate application with staying power, using this high performance range of glue guns.

Hot melt glue guns are essential to heat glue to melting point, applying adhesion to the exact spot, swiftly and with maximum ease.

All hot melt glue guns come with a 12-month guarantee and full after-sales service when used with hot melt glue sticks supplied by Macfarlane.

### SL120 Glue gun

The **SL120** Glue Gun uses 12mm glue stick and operates at 240V.

- Dispenses 12mm hot melt up to 33g/min
- With 'power-on' LED light display
- Comfortable grip and long trigger for added operator comfort
- Stick Size: 12 mm

Product Code	Pack Qty
251389	1

SL120

### SL300 Glue gun

The **SL300** Glue gun uses 12mm glue stick and operates at 240V.

- Industrial tool dispenses 12mm hot melt up to 1500g/Hr
- Easy change thermostat values for low melt glues
- Ergonomic design with 'soft feel' handle and adjustable trigger stroke
- Glue adjuster screw for controlled glue dosage
- Stick Size: 12mm

Product Code	Pack Qty
251391	1

SL300

Tacky when heated, setting fast when cool, hot melt glue is an effective adhesive that hardens within just a few seconds of application, providing a tough, resistant bond. Commonly used in manufacturing, woodwork and art and craft hobbies, hot melt glue is also an effective alternative to packing tapes for sealing cardboard boxes.

**Warning:** Hot melt glues can scald, causing burning and blisters. Always check the heat sensitivity of material before applying.

Product Code	Adhesive Colour	Description	Use with	Size (mm)	Unit (kg)
000332	Clear	Fast setting adhesive	SL120 Glue Gun	12 x 300 Stick	5
000323	Brown	Fast setting adhesive	SL300 Glue Gun	12 x 300 Stick	5

# Auxiliary Equipment

Solutions such as automated labelling equipment, case stackers, case sorters, palletisers, and conveyor systems are also available to keep your operation running smoothly.

We can also supply a range of warehouse equipment, such as packing benches and overhead hoppers that store and automatically release ready-to-use air cushions, significantly increasing your packing times.

Solutions, such as pick trolleys will help you move packaging and products around your warehouse more efficiently, maximising productivity and facilitating warehouse logistics.

Contact us for more information.

## How to scale automation to your company's needs

Packaging automation is available for businesses of most sizes and can be scaled depending on your needs.

### For smaller businesses

- If your operation is smaller, you can initially opt for automated equipment, like gummed paper tape dispensers or tabletop void fill dispensers.
- The big space savings offered by voidfill and cushioning machines can allow a company to expand its activities whilst deferring costly relocation to bigger premises.
- Smaller machines are available for lower throughput, with free machine trials and supported/amortised cost options further ensuring that cash flow is kept healthy.
- If your business is palletising goods, a stretch wrap machine can often pay dividends quickly, if you wrap 15 pallets or more, and won't cost the Earth when it comes to your capital.

### For bigger operations

For packing operations where demand is high or you're forecasting significant growth, you can opt for fully integrated solutions, including:

- In-line case erectors and box makers
- Automatic labelling systems
- Conveyors
- Automated picking solutions

If your packing and shipping operations are under strain and failing to meet demand, consider a full packaging review; it may be that your old processes can no longer support the needs of your business.

An investment in the short term can pay long term dividends and provide a basis from which your operations can expand.

### As your business grows

It can feel overwhelming to keep a hold of your operation, no matter the size. It might seem scary but adding (even a small element) of an automated packing system, is a great way to allow your operation to develop. Over time, if you wish, you can explore bigger, fully automated machines.

A recent survey has shown that productivity during peak demand remains the biggest challenge for online retailers and 3PLs, with 31% saying it was a significant concern. In addition, 46% reported needing to hire temporary labour to cope with demand.

Packaging automation can help futureproof for seasonal demand and limit the need for reliance on seasonal labour. Furthermore, automation equipment can be fully customised to your needs and integrated with your existing packing lines if required. You can also integrate it with your current software and processes, which helps increase efficiency and productivity in your operations.

If you're still unsure or would like to learn more, the Macfarlane Packaging team can provide expert advice on automating your packaging processes and supplying the packaging machinery and warehouse equipment you need. Contact us today.

# Macfarlane Packaging protects...

...your ESG commitments

Our wide range of sustainable packaging products and solutions help reduce the environmental impact of your business. This helps you meet your ESG commitments and, increasingly, it's what your customers demand.

## What will you protect?
